

VANDERKLOOF PV AND BESS DEVELOPMENT COMMENTS & RESPONSE REPORT

VANDERKLOOF SOLAR PV AND BESS FACILITIES		
PROJECT	DFFE REFERENCE NUMBER	DFFE Case Officer
VANDERKLOOF BESS 1	14/12/16/3/3/2/2639	Mr Jay – Jay Mpelane
VANDERKLOOF BESS 2	14/12/16/3/3/2/2640	Ms Azrah Essop
VANDERKLOOF BESS 3	14/12/16/3/3/2/2641	Ms Constance Musemburi
VANDERKLOOF BESS 4	14/12/16/3/3/2/2642	Mr Jay – Jay Mpelane
VANDERKLOOF BESS 5	14/12/16/3/3/2/2643	Ms Azrah Essop
VANDERKLOOF PV 1	14/12/16/3/3/2/2644	Mr Jay – Jay Mpelane
VANDERKLOOF PV 2	14/12/16/3/3/2/2645	Ms Azrah Essop
VANDERKLOOF PV 3	14/12/16/3/3/2/2646	Ms Constance Musemburi
VANDERKLOOF PV 4	14/12/16/3/3/2/2647	Mr Jay – Jay Mpelane
VANDERKLOOF PV 5	14/12/16/3/3/2/2648	Ms Azrah Essop
All comments below are applicable to all ten projects (i.e. Vanderkloof PV 1-5 and Vanderkloof BESS 1-5) listed above unless otherwise specified¹.		

¹ As per DFFE requirements, all comments received have been captured “verbatim” and in the format provided by the Department in their comment on the Draft Scoping Report..

Date of comment, format of comment, name of organization/I&AP	Comment	Response from EAP
COMMENTS RECEIVED ON FINAL SCOPING REPORT ACCEPTANCE LETTERS FROM THE DFFE		
05/02/2025 Department of Forestry, Fisheries and the Environment	Application Form	
	a) Please provide a full description of how the listed activity is triggered by the proposed development, including the threshold where necessary e.g. length, area etc. Only activities applicable to the development must be applied for and assessed. As such, you are requested to provide the physical footprint of the infrastructure to motivate the applicability of this listed activity/ies.	These are included in the tables in section 3.1.2 of the Draft EIR.
	b) If the activities applied for in the application form differ from those mentioned in the scoping report, an amended application form must be submitted for final review and decision making.	The activities detailed in the Scoping Report and those outlined in the application forms are the same. Revised application forms will be submitted with the Final EIR in order to outline the project description changes affected after the EIR stage of the Environmental Process.
	c) The listed activities represented in the EIAR, and the application form must be the same and correct. The EIAR must assess the correct sub listed activity for each listed activity applied for.	These are included in the tables in section 3.1.2 of the Draft EIR.
	Public Participation	
a) A consolidated assessment and public participation process will be undertaken in respect of all 10 applications. However, all projects must appear on all site notices, newspapers and etc, with its reference numbers and project titles.	Additional site notices were placed on the properties and an additional newspaper advert was placed in Die Bloem Nuus. These additional Site Notices and Adverts included reference numbers and descriptions of all 10 Projects. Please refer to Section 18 of this EIR and Appendix F3.	

	<p>a) Please ensure that comments from all relevant stakeholders are submitted to the Department with the EIAR. This includes but is not limited Department of Forestry, Fisheries, and the Environment (DFFE): Biodiversity Planning and Conservation (BCAdmin@dffe.gov.za); Water Sources and Wetlands Conservation Directorate (StanleyT@dffe.gov.za for attention Mr Stanley Tshitwamulomoni); Provincial Department, South African Heritage Resources Agency (SAHRA), South African Civil Aviation Authority, Birdlife South Africa, SANPARKs, local interest groups, for example: Councillors and Rate Payers associations; Surrounding landowners, Farmer Organisations, Environmental Groups and NGOs; and Grassroots communities and structures as well as the affected district and local municipalities.</p>	<p>All these parties have been registered as Key stakeholders in the Environmental Process and were provided an opportunity to comment on the Draft Scoping Report. They will be provided with a further opportunity to comment on the Draft Environmental Impact Report.</p>
	<p>b) Please ensure that all issues raised, and comments received during the circulation of the final SR from registered Interested and Affected Parties (I&APs) and organs of state which have jurisdiction in respect of the proposed activity are adequately addressed in the EIAR. Proof of correspondence with the various stakeholders must be included in the final EIAR. Should you be unable to obtain comments, proof should be submitted to the Department of the attempts that were made to obtain comments.</p>	<p>Please refer to the comments and responses report attached in Appendix F2. State Departments and Organs of State who did not comment during the scoping phase will be provided with a further opportunity to comment on the Draft EIR.</p>
	<p>c) A Comments and Response trail report (C&R) must be submitted with the EIAR. The C&R report must incorporate all comments for this development. The C&R report must be a separate document from the main report and the format must be in the table format as indicated in Appendix 1 of this comments letter in chronological order. Please refrain from summarising comments made by I&APs. All comments from I&APs must be copied verbatim and responded to clearly. Please note that a response such as “noted” is not regarded as an adequate response to I&AP’s comments.</p>	<p>Please refer to Appendix F2</p>
	<p>d) Comments from I&APs must not be split and arranged into categories. Comments from each submission must be responded to individually.</p>	<p>As can be seen from the Comments and Responses report in appendix F2, the majority of comments are associated with I&AP registrations from local residents of Luckhoff. These submissions have been captured separately.</p>
	<p>e) The Public Participation Process must be conducted in terms of Regulation 39, 40, 41, 42, 43 & 44 of the 2014 NEMA EIA Regulations, as amended.</p>	<p>Please refer to Appendix F and Section 18 of this EIR for demonstration of compliance with Regulation 39, 40, 41, 42, 43 & 44 of the 2014 NEMA EIA Regulations, as amended.</p>
	<p>f) Kindly include a timeline of the Public Participation Processes (PPP) that have been conducted for the proposed project since the lodging of the application.</p>	<p>Please refer to Section 18 where the timeline of all stakeholder engagement processes is outlined.</p>

Layout & Sensitivity Maps	
<p>a) The layout map must be overlain with the sensitivity map and a cumulative map which shows neighbouring energy developments and existing grid infrastructure. It must be emphasised that the final EIAR must include a final layout map which adheres to specialist recommendations as well as any identified no-go areas.</p>	<p>The Layout plans with sensitivity overlays of the preferred alternative for each project as well as overview maps of the entire cluster are attached in Appendix D1 – D12.</p>
<p>b) A copy of the final preferred layout map must be provided which includes all available biodiversity information used in the finalisation of the layout map. Existing infrastructure must be used as far as possible e.g., roads. The final layout map must indicate the following:</p> <ul style="list-style-type: none"> - Ensure that the titles of the maps are consistent. The preferred layout must be presented in the final layout map. - The envisioned area for the PV/BESS facility, i.e. final location of all associated infrastructure including BESS, substations etc, should be mapped at an appropriate scale. - All supporting onsite infrastructure such as laydown areas, guard house, BESS, control room, and buildings, including accommodation etc. - All necessary details regarding all locations and sizes of the substations and internal power lines. - All supporting onsite infrastructure such as on-site IPP substation, temporary and permanent laydown areas, overhead or underground cabling, BESS area, access roads and internal gravel roads, fencing and lighting, telecommunication infrastructure area, stormwater channels, water pipelines, offices and operational control centre, operation and maintenance area / warehouse / workshop, ablution facility areas, and etc. - All necessary details regarding related to the proposed PV and BESS facility. - All existing infrastructure on the site, especially internal road infrastructure. - Please provide an environmental sensitivity map, if possible, which indicates the following: <ul style="list-style-type: none"> i. The location of sensitive environmental features on site, e.g., CBAs, protected areas, heritage sites, wetlands, drainage lines etc. that will be affected by the facility and its associated infrastructure; <p>Sensitivity Buffer areas; and All “no-go” areas.</p>	<p>Final Site Layout Plans of the preferred alternative (Layout Alternative 3) for Each of the projects are included in Appendices D1 – D12. All information listed in the Departments Acceptance of the Final Scoping Reports have been included in these Site Layout Plans.</p>

	<p>c) It is acknowledged that the mapping provided is preliminary and will be finalised in the upcoming documents. Note that coordinates of proposed infrastructure and the final layout must be provided in the subsequent documents. All recommendations, limitations, buffer areas and no-go zones must be incorporated into the final layout.</p>	<p>All recommended no go areas and buffers determined by the specialists have been incorporated into the Preferred Layouts (Layout Alternative 3). The Sensitivity overlays in appendix D depict how the layouts have been responsive to the site sensitivities. The detailed co-ordinates for each of the projects are included in the tables above.</p>
	<p>d) Please ensure that mapping differentiates between the different facilities on maps that are combined. Note that final layout maps must be provided per facility, in addition to a cumulative layout map showing the Vanderkloof Cluster.</p>	<p>Please refer to:</p> <ul style="list-style-type: none"> - Appendix D1 (Combined Overview Maps) - Appendix D2 (Maps for Vanderkloof PV 1) - Appendix D3 (Maps for Vanderkloof PV2) - Appendix D4 (Maps for Vanderkloof PV3) - Appendix D5 (Maps for Vanderkloof PV4) - Appendix D6 (Maps for Vanderkloof PV5) - Appendix D7 (Maps for Vanderkloof BESS 1) - Appendix D8 (Maps for Vanderkloof BESS 2) - Appendix D9 (Maps for Vanderkloof BESS 3) - Appendix D10 (Maps for Vanderkloof BESS 4) - Appendix D11 (Maps for Vanderkloof BESS 5) - Appendix D12 (Cumulative Maps)
Specialist Assessments		
	<p>a) The EAP must ensure that, all required specialist studies are identified, recommended and assessed for the proposed Vanderkloof Cluster.</p>	<p>All specialist reports identified in the approved Plan of Study for EIA have been undertaken and are included in Appendix E1 – E10.</p>

	<p>b) The EAP must ensure that the terms of reference for all the identified specialist studies must include the following:</p> <ul style="list-style-type: none"> - A detailed description of the study's methodology; indication of the locations and descriptions of the development footprint, and all other associated infrastructures that they have assessed and are recommending for authorisations. - Provide a detailed description of all limitations to the studies. All specialist studies must be conducted in the right season and providing that as a limitation will not be allowed. - Please note that the Department considers a 'no-go' area, as an area where no development of any infrastructure is allowed; therefore, no development of associated infrastructure including access roads is allowed in the 'no-go' areas. - Should the specialist definition of 'no-go' area differ from the Departments definition; this must be clearly indicated. The specialist must also indicate the 'no-go' area's buffer if applicable. - All specialist studies must be final, and provide detailed/practical mitigation measures for the preferred alternative and recommendations, and must not recommend further studies to be completed post EA. - Should a specialist recommend specific mitigation measures, these must be clearly indicated. <p>Regarding cumulative impacts:</p> <ul style="list-style-type: none"> - Clearly defined cumulative impacts and where possible the size of the identified impact must be quantified and indicated, i.e. hectares of cumulatively transformed land. - A detailed process flow to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project. - Identified cumulative impacts associated with the proposed development must be rated with the significance rating methodology used in the process. - The significance rating must also inform the need and desirability of the proposed development. - A cumulative impact environmental statement on whether the proposed development must proceed. 	<p>Please refer to the methodology detailed in each of the specialist reports attached in appendices E1 – E10. The limitations of the various specialists assessments are included in section 1.3.1 – 1.3.6 of this report.</p>
--	--	---

<p>c) Please include a table that shows the proposed studies and the relevant specialists conducting the study, along with the date completed. In addition, a summary should be included of the specialist's recommendations in terms of the alternatives that are preferred based on the findings of their study.</p>	<p>This has been included in the non-technical summary at the beginning of this report.</p>
<p>d) Please note that specialist assessments must be conducted in accordance with the Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, , which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. "the Protocols"), and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal species).</p>	<p>Where relevant, all specialist studies have been conducted in compliance with Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998. Where these procedures are not relevant, studies have been conducted in terms of Appendix 6 of the EIA regulations.</p>
<p>e) The specialist assessments must provide an impact statement on the revised layout once complete, and include whether further mitigations, monitoring, etc are necessary.</p>	<p>The overall impact statement as well as that for each of the specialists for each project is included in sections 6 – 15 of this EIR. A cumulative Impact statement is included in Section 16.</p>
<p>Alternatives</p>	
<p>The EAP is required to provide clear assessment for each identified alternative and further provide clear motivation and reasons as to why the preferred alternative proves to be the preferred compared to other alternatives.</p>	<p>Please refer to Section 2.11.</p>
<p>The following alternatives were identified for the project:</p> <ul style="list-style-type: none"> i. Location/Site alternatives. ii. Solar Panel Technology Alternatives. iii. Battery Energy Storage (BESS). iv. Site Layout and Design. v. No-Go Alternative. 	<p>Please refer to Section 2.11.</p>
<p>If these alternatives are not assessed, clear reasons and motivation must be provided as to why these alternatives are not assessment. Even if the Applicant only identified one site location, the EAP is required to provide clear assessment of the site location. Both positive and negative impacts.</p>	
<p>Environmental Management Programme (EMPr)</p>	

	<p>a) The final EMPr must include the following:</p> <ul style="list-style-type: none"> - All recommendations and mitigation measures recorded in the EIAR and the specialist studies conducted. - An environmental sensitivity map indicating environmental sensitive areas and features identified during the assessment process. - Measures to protect hydrological features such as streams, rivers, pans, wetlands, dams and their catchments, and other environmental sensitive areas from construction impacts including the direct or indirect spillage of pollutants. - An alien/invasive plant management report; plant rescue and protection report; and re-vegetation and habitat rehabilitation report. - In addition to the above, the EMPr must comply with Appendix 4 of the 2014 NEMA EIA Regulations, as amended. 	Please refer to Appendix J
	<p>b) It is drawn to your attention that for a substation and overhead electricity transmission and distribution infrastructure, when such facilities trigger activity 11 or 47 of the 2014 NEMA EIA Regulations Listing Notice 1 of, as amended, and any other listed and specified activities necessary for the realisation of such facilities, the Generic Environmental Management Programme, must be used and submitted with the final report over and above the EMPr for the facility i.e. separate EMPr's for the substation and the facility. Ensure that signed versions of the generic EMPr is submitted with the final EIAR.</p>	The Generic EMPr for substation infrastructure is appended the Main EMPr attached in Appendix J.
Environmental Management Programme (EMPr)		
	<p>Details of the future plans for the site and infrastructure after decommissioning in 20-30 years and the possibility of upgrading the proposed infrastructure to more advanced technologies must be indicated.</p>	This is included under Decommissioning Scenarios that have been identified in the EMPr in Appendix J.
	<p>Comment issued on the draft SR is still valid and must be adhered to.</p>	All comments that were identified in the Departments comment on the DRS have been incorporated into this document where they were relevant to the EIR stage of the Environmental Process.
	<p>The applicant is hereby reminded to comply with the requirements of Regulation 45 of GN R982 of 04 December 2014, as amendment, with regard to the time period allowed for complying with the requirements of the Regulations.</p>	This Draft EIR and associated documentation is submitted within this allowable timeframe.
	<p>You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an environmental authorisation being granted by the Department.</p>	The applicant and EAP is aware of this requirement.

COMMENTS & REGISTRATIONS RECEIVED AFTER SUBMISSION OF FINAL SCOPING REPORT		
23/01/2025 Email (Online Website Registration) Mr Gert Grif	Registration Only.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
22/01/2025 Email (Online Website Registration) Mr Qwenta Rabie Rens	I would like to participate on all platforms set for the project.Thank You	Thank you for your email and registration as part of the Environmental Process for the proposed Vanderkloof PV and BESS development, we confirm that you have been registered as an interested and affected party for this proposed development. Cape EAPrac are currently facilitating the Environmental Assessment Process for these proposed projects. Should you have any comments relating to the Environmental Impact of the proposed project, kindly provide these to us. Only after completion of the environmental and power purchase agreement processes, will the developer start with contract and labour procurement. We confirm that we will provide your details and comment to the developer for consideration in any further processes.
20/01/2025 Email (Online Website Registration) Mr Kabelo Mphephuka	hard working , care taker and a very strong community supplier	Thank you for your email and registration as part of the Environmental Process for the proposed Vanderkloof PV and BESS development, we confirm that you have been registered as an interested and affected party for this proposed development. Cape EAPrac are currently facilitating the Environmental Assessment Process for these proposed projects. Should you have any comments relating to the Environmental Impact of the proposed project, kindly provide these to us. Only after completion of the environmental and power purchase agreement processes, will the developer start with contract and labour procurement. We confirm that we will provide your details and comment to the developer for consideration in any further processes.
20/01/2025 Email (Online Website Registration) Mr Firecia Louw Ms Sadie Koetzee Mr Samuel Koetzee	Registration Only.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.

<p>15/01/2025 Email (Online Website Registration) Ms Anna Adams</p>	<p>Unemployed Hard working General worker experience Cleaning experience Cashier experience</p>	<p>Thank you for your email and registration as part of the Environmental Process for the proposed Vanderkloof PV and BESS development, we confirm that you have been registered as an interested and affected party for this proposed development. Roderic Khombelakho		
28/11/2024 Email (Online Website Registration) Mrs Sara Koopman	Registration only.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
27/11/2024 Email (Online Website Registration) Csiphosethutradings (pty) ltd Mr Sphosethu Mvandaba	Application for registration and Data bases.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
26/11/2024 Email (Online Website Registration) Mr Charl Williams	Registration only.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
26/11/2024 Email (Online Website Registration) Mr Llwellyn Lott	Registration only.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
25/11/2024 Email (Online Website Registration) Ms Mangaka Portia Lenyatsa	Registration only.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
25/11/2024 Email (Online Website Registration) Ms Zinsile Doctor Mphunga	Registration only.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
21/11/2024 Email (Online Website Registration) Mrs Agnes Raaad	intrested and affected person.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
21/11/2024 Email (Online Website Registration) Mrs Lena Mokhahle	intrested and affected.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
21/11/2024 Email (Online Website Registration) Mr Motswana Jacobus Kolobe	i will like to see the project to take place to assist reduce unemployment in this affected areas.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.

20/11/2024 Telephonic Atlantic Renewable Energy Partners (Pty) Ltd	Registration only.	As discussed, this morning, I confirm that we have registered yourself, David and Michael as I&AP's on the proposed Vanderkloof PV and BESS Projects.
20/11/2024 Email (Online Website Registration) Mr Isaac Senti	Affected area.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
20/11/2024 Email (Online Website Registration) Mrs Jeanett Puleng Islam	Can u please help me to get all information that are needed 🙏 Thank you for your assistance.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process. All available documents and information can be accessed via the Cape EAPrac website (www.cape-eaprac.co.za under 'Active Projects' – the project is listed as "Vanderkloof Solar PV").
20/11/2024 Email (Online Website Registration) Mr Thabang Jeffrey Masoabi	I could highly appreciate you feedback.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process. All available documents and information can be accessed via the Cape EAPrac website (www.cape-eaprac.co.za under 'Active Projects' – the project is listed as "Vanderkloof Solar PV").
20/11/2024 Email (Online Website Registration) Ms Xoliswa Maramnco	I could appreciate your feedback.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process. All available documents and information can be accessed via the Cape EAPrac website (www.cape-eaprac.co.za under 'Active Projects' – the project is listed as "Vanderkloof Solar PV").
19/11/2024 Email (Online Website Registration) Ms Erasuna Malgas	Located in the area.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.
19/11/2024 Email (Online Website Registration) Mr Isaac Sello Mokhahle	Affected area.	Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.

<p>15/11/2024 Email (Online Website Registration) Mr Johan Zeelie</p>	<p>I am responsible for the administration of the Conservation of Agricultural Resources Act, 1983 (Act 43 of 1983) and comments will be provided in due course.</p>	<p>Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.</p>
<p>05/11/2024 Email Nrateng Mashiloane South Africa Civil Aviation Authority (SACAA)</p>	<p>SACAA has no comments for the proposed development. The proposed site is located away from aviation infrastructure, showing no significant negative impacts on airport operations. However, a formal obstacle assessment is required for the proposed development as it includes the establishment of solar photovoltaic and associated infrastructure. Kindly lodge an application as published on the SACAA website: www.caa.co.za/industryinformation/obstacles/. The list and contact details of the approved obstacles assessment services providers can be obtained from the CAA website: www.caa.co.za.</p>	<p>SACAA's comment of no objection is noted and put on record. The applicant will submit a formal obstacle assessment as required by SACAA.</p>
<p>01/11/2024 Email Thato Nape South African Radio Astronomy Observatory (SARAO)</p>	<p>Received, thank you Dale. Will send the letter in due course.</p>	<p>Thank you very much for the response. I have attached a KMZ of the Project Study Site, which may be useful in locating the position of the project.</p>
<p>31/10/2024 Email Mr David Nunez</p>	<p>Thanks for the information, much appreciated! Do you know which project (PV1...5) corresponds to which color polygon (green, blue, purple, yellow, orange) in the map?</p>	<p>The coloured polygons just depict the different affected landowners. For the scoping phase, the configuration of the 5 PV projects within the study area has not yet been determined. These will be determined during the EIA phase taking into consideration any comment (particularly from neighbouring properties) and the outcome of the second season of avifaunal monitoring.</p>
<p>31/10/2024 Email Mr John Geeringh ESKOM</p>	<p>Please find attached Eskom requirements as well as a setbacks guideline for RE Developments.</p>	<p>The Eskom requirements as well as a setbacks guideline for RE Developments will be incorporated into the Environmental Management Programme that will be presented as part of the Draft Environmental Impact Assessment Report.</p>
<p>31/10/2024 Email Air Traffic & Navigation Services</p>	<p>Thank you for contacting the Obstacle Evaluations Team. This is an auto reply to let you know that we have received your email, and we will respond to it as soon as possible.</p>	<p>The applicant will submit a formal obstacle assessment as required by SACAA.</p>
<p>COMMENT RECEIVED FROM DFFE ON DRAFT SCOPING REPORT</p>		

<p>20/11/2024 Email Department of Forestry, Fisheries and the Environment on Vanderkloof BESS 1 (14/12/16/3/3/2/2639)</p>	<p><u>Application Form:</u> a) Please note that the Minister is the competent authority for applications for facilities or infrastructure, which will form part of the Integrated Resource Plan (IRP) Programmes for technologies whose procurement processes have been determined under the Electricity Regulation Act, 2006 and / or the Electricity Regulations on New Generation Capacity. If the applicant will not, or does not intend to, participate in any of the IRP programmes, the competent authority will be the MEC responsible for environmental affairs in the respective province. Be advised that this information must be clearly presented in Section 1 –Competent Authority in the application form.</p>	<p>The applicant intends participating in the Battery Energy Storage Independent Power Producers Procurement Programme (BESIPPP) as part of the IRP under determination in the Energy Regulation Act. The Minister is therefore deemed to be the Competent Authority in respect of this application. This has been clarified in the Final scoping report as well as the revised application form attached in Appendix I.</p>
	<p><u>Application Form:</u> b) Reflecting the above, the reasons provided in Section 1 of the application form for this Department being the Competent Authority in terms of S24C of NEMA are incomplete. This must be rectified and expanded on in the application form as well as the report. Please refer to GN 779.</p>	<p>The reasons provided in section 1 of the Application form were based on an IQ (IQ 2023/253) issued by the Department on 26 September 2023. This was further clarified via email correspondence with Mr Coenrad Agenbach of the Department on 24 January 2024. This has been clarified in the report and revised application form attached as Appendix I. According to GN 779, the Minister is the competent authority for all activities related to the IRP 2010 – 2030. Please note that the application form will need to be further revised once the final preferred layout alternative is determined in the Environmental Impact Assessment Phase of the Environmental process.</p>
	<p><u>Application Form:</u> c) Please provide a contact person for the local Municipality in the application form.</p>	<p>The general enquiries email for Letsemeng Municipality will remain registered, as the EAP has been advised to lodge all request for comments through this email address (the Municipality will then forward to relevant parties). In addition to this, the Municipal Manager, Mr Tshemedi Lucas Mkhwane has been added to the application form and the I&AP register.</p>
	<p><u>Application Form:</u> d) Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure (including thresholds) as described in the project description. Only activities (and sub-activities) applicable to the development must be applied for and assessed moving forward.</p>	<p>The listed activities applied for in the application form and those considered in the scoping report are specific to the proposed development in respect of the development proposal in respect of the study site currently proposed. A revised application form will be submitted during the EIA phase of the environmental process, once the preferred layout alternative is determined.</p>
	<p><u>Application Form:</u> e) Ensure that the SG codes, all farm names and numbers and the EAP's contact details are correct. The farm names and SG codes must be clearly differentiated for the grid infrastructure and the PV facility infrastructure.</p>	<p>The property descriptions and SG codes for the PV projects as reflected in the application form and Draft Scoping are confirmed to be correct. Kindly note, that the current application only includes the IPP substation, which is proposed to be situated on the same properties as the PV development. The grid connection infrastructure is being applied for via a separate environmental application, which will be administered by the Provincial Authority.</p>
	<p><u>Application Form:</u></p>	<p>The GPS Coordinates for the onsite substation, battery energy storage system (BESS) facility, and access road (start, middle, and endpoint) will be</p>

	f) Include the GPS Coordinates for the onsite substation, battery energy storage system (BESS) facility, and access road (start, middle, and endpoint).	provided in the revised application form which will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	<p>Listed Activities:</p> <p>a) It is noted that the proposed solar facility does not fall within the Renewable Energy Development Zone (REDZ) as per GN 114, as such this application will be considered as a normal EIA application.</p>	It is confirmed that all of the proposed Vanderkloof PV and BESS applications fall outside of the promulgated Renewable Energy Development Zones (REDZ). All of the projects forming part of the Vanderkloof PV and BESS development require Authorisation of activities listed in listing notice 2 of the 2014 EIA regulations (as amended) and as such will be subjected to a Scoping and Environmental Impact Reporting Process.
	<p>Listed Activities:</p> <p>b) Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure (including thresholds) as described in the project description. Only activities (and sub-activities) applicable to the development must be applied for and assessed.</p>	All relevant listed activities applied for are relevant and specific to the project description in relation to the proposed study area. A revised application form will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	<p>Listed Activities:</p> <p>c) Activity 27 of Listing Notice 1: Clarify whether this activity is only relevant to clearance of indigenous area for the Pv/ or onsite substation/ or BESS. Include the threshold of total indigenous vegetated area to be cleared.</p>	This activity is associated with the total clearance of vegetation associated with the Vanderkloof BESS 1 project and includes, the BESS, on site substation and laydown area. The total clearance of vegetation in respect of the Vanderkloof BESS 1 project will be approximately 12ha (the exact extent of indigenous vegetation clearance will be determined during the environmental impact assessment phase of the environmental process, once the preferred layout alternatives are determined.
	<p>Listed Activities:</p> <p>d) You are required to confirm whether the competent authority adopts systematic biodiversity plans or bioregional plans. There are certain activities in Listing Notice 3 that requires that Bioregional Plans to be adopted.</p>	The Free State Biodiversity Sector Plan has been approved by the Free State Department of Economic, Small Business Development, Tourism and Environmental Affairs in October 2024. It is uncertain whether this plan has also been adopted as part of a bioregional plan in a provincial Gazette. The relevant state department and terrestrial biodiversity specialist will be engaged further during the Environmental Impact Assessment phase of the environmental process and the application form will be revised accordingly (should listed activities in listing notice 3 need to be excluded.)
	<p>Listed Activities:</p> <p>e) It is imperative that the relevant authorities are continuously involved throughout the environmental impact assessment process, as the development property possibly falls within geographically designated areas in terms of Listing Notice 3 Activities. Written comments must be obtained from the relevant authorities (or proof of consultation if no comments were received) and submitted to this Department. In addition, a graphical representation of the proposed development within the respective geographical areas must be provided. Please also ensure that the potential impacts on the affected Critical</p>	During the scoping phase of this environmental process, comments were not received from the provincial authority. Further engagement with the provincial environmental authority will take place during the impact assessment phase of the environmental process. One of the key outcomes of the terms of reference provided to the specialists is to assess the impact of the proposed project on Critical Biodiversity and Ecological Support Areas.

	Biodiversity Areas and Ecological Support Areas are fully assessed in the final Environmental Impact Assessment Report (EIAR).	
	<p>Listed Activities: f) If the activities applied for in the application form differ from those mentioned in the final SR, an amended application form must be submitted. Please note that the Department's application form template has been amended and can be downloaded from the following link https://www.dffe.gov.za/documents/forms.</p>	The activities applied for in the application form and those reflected in the Draft and Final Scoping Report are the same. The application form submitted with the Draft Scoping Report will be revised during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	<p>The draft Layout & Sensitivity Maps Please provide a layout map which indicates the following:</p> <p>a) The entire location of the one 1000MWh BESS facility (known as Vanderkloof BESS 1).</p> <p>b) The location of the associated infrastructure which includes the following:</p> <ul style="list-style-type: none"> • An up to 8ha electrolyte tank footprint or solid-state containerized battery area with interspersed internal roads, cabling routes, and energy management system (EMS) modules. • On-site substation (~2ha). • Temporary laydown areas which will not exceed 1ha and will be situated within the assessed footprint. • Permanent laydown areas (~0.3ha). • Permanent auxiliary buildings (~0.5ha) that includes guardhouses, workshops, operations and control centres, Offices, and accommodation. • Temporary accommodation buildings with associated canteens and ablutions of up to 0.1ha. <p>c) Access roads – 8m wide and ~14km long (8.5km existing, 3km existing with upgrades required, 2.5km to be constructed).</p> <p>d) Perimeter fencing not exceeding 3m in height.</p> <p>e) Rainwater tanks.</p> <p>f) Diesel tanks (up to 80m³ for the entire Vanderkloof Solar PV and BESS Facilities).</p> <p>g) The location of sensitive environmental features on site e.g., CBAs, heritage sites, wetlands, drainage lines etc. that will be affected;</p> <p>h) Buffer areas; and All “no-go” areas.</p> <p>i) The above map must be overlain with a sensitivity map and a cumulative map which shows neighbouring renewable energy developments and existing grid infrastructure.</p>	As indicated in the Draft Scoping Report, the preferred layout alternative will only be determined on completion of the scoping phase of the environmental process. This rationale was followed in order to allow for the outcome of the specialist SSVR's, and initial public participation process (including input from the competent authority)to inform the preferred layout alternative. The detailed site layout plan will be presented to the Competent Authority and Potential and Registered I&AP's as part of the Draft Environmental Impact Report.

	<p>Public Participation Process: a) Please ensure that all issues raised, and comments received on the draft SR from registered I&APs and organs of state which have jurisdiction (including this Department's Biodiversity Section: BCAdmin@dffe.gov.za, the provincial authority and the local municipality) in respect of the proposed activity are adequately addressed in the final SR. Proof of correspondence with the various stakeholders must be included in the final SR. Should you be unable to obtain comments, proof must be submitted to the Department of the attempts that were made to obtain comments.</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p>
	<p>Public Participation Process: b) The Public Participation Process must be conducted in terms of the approved public participation plan and Regulation 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014, as amended. Take note of the timeframes required for adequate public participation.</p>	<p>The public participation is currently being undertaken in terms of Regulation 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014. Please refer to Table 34 in section 7 of the Final Scoping Report for details of compliance with the abovementioned regulations. Section 7 of the Final Scoping Report should be read in conjunction with the following appendices:</p> <ul style="list-style-type: none"> - Appendix F1: I&AP register - Appendix F2: Comments and Responses Report - Appendix F3: Adverts and Site Notices - Appendix F4: Draft Scoping Report Notifications - Appendix F5: Draft Scoping Report Comments Received.
	<p>Public Participation Process: c) A comments and response trail report (C&R) must be submitted with the final SR. The C&R report must incorporate all historical comments (pre and post submission of the draft SR) for this development. The C&R report must be a separate document from the main report and the format must be in the table format which reflects the details of the I&APs and date of comments received, actual comments received, and response provided. Please ensure that comments made by I&APs are comprehensively captured (copy verbatim if required) and responded to clearly and fully. Please note that a response such as "Noted" is not regarded as an adequate response to I&AP's comments.</p>	<p>A comments and responses report is Attached in Appendix F2 of the Final Scoping Report. This comments and responses report included all comments receive prior to submission of the Draft Scoping Report as well as comments received on the Draft Scoping Report and afterwards (up until the point of submission of the Final Scoping Report). This same comments and responses report will be further updated in the Draft Environmental Impact Report (in order to capture comments received between submission of the Final Scoping Report and Draft Environmental Impact Report) The Comment and responses report will be further updated on completion of the comment period on the Draft EIR. All comments have been captured verbatim and responded to individually. The Comments and Responses report is in the format proposed by the Department.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase: a) The EAP must ensure that all required specialist studies for the project are identified and recommended.</p>	<p>Please refer to section 6 of the Final Scoping Report (Plan of Study for Environmental Impact Assessment). This section identifies all specialist assessments that will take place during the Environmental Impact Assessment phase of the environmental process. It furthermore outlines the aspects that need to be considered and assessed by each of the specialists.</p>

	<p>Specialist Assessments to be conducted in the EIA Phase: b) Specialist studies to be conducted must provide a detailed description of their methodology, as well as indicate the locations and descriptions of PV arrays, and all other associated infrastructures that they have assessed and are recommending for authorisations.</p>	<p>At the current phase of the Environmental Impact Assessment Process, specialists are considering the full extent of the study site in order to identify sensitive areas as well as constraints and opportunities for the proposed development. The outcome of the Scoping Level Studies and Site Sensitivity Verifications and the outcome of the initial public participation process will be used to inform the preferred layouts for each of the proposed facilities. These layouts will be presented in the Environmental Impact Assessment phase of the environmental process and all specialists will be required to assess the all aspects of the project in detail. As agreed upon with the Department, separate chapters (assessments) will be undertaken for each of the projects making up the greater Vanderkloof PV and BESS development. The Methodology applied by each of the specialists is outlined in the respective specialist reports attached in Appendices E1 – E6.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase: c) It is further brought to your attention that Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for Environmental Authorisation, which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. “the Protocols”), and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal species), have come into effect. Please note that specialist assessments must be conducted in accordance with these protocols. Please note further that the protocols require the specialists’ to be registered with SACNASP in their respective field.</p>	<p>All relevant specialist studies (Terrestrial Biodiversity, Plant Species, Animal Species and Agriculture) will be undertaken in terms of the the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998. The EAP has verified that all specialists appointed are suitably experienced and qualified as well as appropriately registered with SACNASP.</p> <p>All relevant specialist studies will be undertaken in accordance with the protocols and details of compliance with the protocols will be included in the Draft Environmental Impact Report.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase: d) Please include a table in the report, summarising the specialist studies required by the Department’s Screening Tool, a column indicating whether these studies were conducted or not, and a column with motivation for any studies not conducted. Please note that if any of the specialists’ studies and requirements/protocols recommended in the Department’s Screening Tool are not commissioned, motivation for such must be provided in the report per the requirements of the Protocols.</p>	<p>Please refer to Table 18 in Section 3.4.17 of the Final Scoping Report which outlines the specialist studies identified in the screening tool along with confirmation as to which will be undertaken and which will not be undertaken (with motivation). In summary, the following specialist studies will be undertaken in the EIA phase of the Environmental Process:</p> <ul style="list-style-type: none"> - Agricultural Compliance Statement, - Landscape/Visual Impact Assessment, - Heritage Impact Assessment (including Cultural Heritage, Archaeology and Palaeontology), - Terrestrial Biodiversity Impact Assessment, - Aquatic Biodiversity Impact Assessment, - Avifaunal Impact Assessment, - Civil Aviation Compliance Statement (to be undertaken by EAP), - Defence Compliance Statement (to be undertaken by EAP), - Geotechnical Assessment,

		<ul style="list-style-type: none"> - Socio-Economic Impact Assessment, - Plant Species Compliance Statement, and - Animal Species Impact Assessment. <p>The only study listed in the screening tool report that will not be undertaken is the RFI Assessment. The Vanderkloof Solar PV and BESS Facilities fall outside of the Northern Cape Province and were furthermore found to be situated more than 156km from the closest Central Astronomy Advantage Area.</p> <p>The South African SKA Project Office and the South African Radio Astronomy Observatory (SARAO) have been registered as a key stakeholder on this environmental process and have been requested to provide input in terms of the Astronomy Geographic Advantage Act and potential impact to SKA.</p>
	<p>Cumulative Assessment to be conducted in the EIA Phase: Should there be any other similar projects within a 20km radius of the proposed development site, the cumulative impact assessment for all identified and assessed impacts must be refined to indicate the following:</p> <ul style="list-style-type: none"> • Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e., hectares of cumulatively transformed land. • Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project. • The cumulative impacts significance rating must also inform the need and desirability of the proposed development. • A cumulative impact environmental statement on whether the proposed development must proceed. 	<p>There are a number of projects that have been identified to have been authorized within a 30km radius of the proposed Vanderkloof PV and BESS development.</p> <p>Please refer to Appendix D1 Cluster Map showing proximity of Vanderkloof PV and BESS to other projects in the vicinity.</p> <p>The plan of study for EIA in section 6 of the Final Scoping Report as well as the Terms of Reference provided to specialists, require a detailed cumulative impact assessment in compliance with the regulations as well as the criteria outlined in the Departments comment.</p>
	<p>General: You are further reminded to comply with Regulation 21(1) of the NEMA EIA Regulations 2014, as amended, which states that: "If S&EIR must be applied to an application, the applicant must, within 44 days of receipt of the application by the competent authority, submit to the competent authority a SR which has been subjected to a public participation process of at least 30 days</p>	<p>The Applicant and EAP are aware of the timeframes outlined in Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p> <p>The Draft Scoping Report was subjected to a 3 day comment period and this final Scoping Report is submitted within the allowable 44 days from receipt of the application form by the competent authority.</p>

	and which reflects the incorporation of comments received, including any comments of the competent authority”.	According to the EAP’s calculations, the 44 day period outlined in regulation 21(1) lapses on Wednesday 08 January 2025.
	General: You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of SRs in accordance with Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.	The Final Scoping Report submitted to the Department complies with the content requirements of Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended. Please refer to the table on PDF page 11 of the Final Scoping Report which demonstrates compliance with Appendix 2 and Regulation 21(1).
	General: Further note that in terms of Regulation 45 of the EIA Regulations 2014, as amended, this application will lapse if the applicant fails to meet any of the timeframes prescribed in terms of these Regulations, unless an extension has been granted in terms of Regulation 3(7).	The requirements in terms of in terms of Regulation 45 of the EIA Regulations 2014, as amended are understood by both the applicant as well as the EAP. This Final Scoping Report has been submitted within the allowable timeframes and an extension granted in terms of Regulation 3(7) has not been required at this stage of the Environmental Process.
	General: You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.	The applicant and the EAP are aware of the requirements in Section 24F of the National Environmental Management Act and that the activities may not commence prior to an environmental Authorisation being granted by the Competent Authority.
20/11/2024 Email Department of Forestry, Fisheries and the Environment on Vanderkloof BESS 2 (14/12/16/3/3/2/2640), Vanderkloof BESS 5 (14/12/16/3/3/2/2643), Vanderkloof PV 2 (14/12/16/3/3/2/2645), Vanderkloof PV 5 (14/12/16/3/3/2/2648).	Application form and Listed Activities: a) Please provide a contact person for the local Municipality in the application form. Application form and Listed Activities: b) Coordinates must be provided per facility and not the entire study site in the EIA phase. Coordinates must include locations of all proposed infrastructure for e.g. offices, substations, access roads, BESS etc.	The general enquiries email for Letsemeng Municipality will remain registered, as the EAP has been advised to lodge all request for comments through this email address (the Municipality will then forward to relevant parties). In addition to this, the Municipal Manager, Mr Tshemedi Lucas Mkhwane has been added to the application form and the I&AP register. For the purposes of the Scoping phase of the environmental process, the full extent of the study site is being considered. This is to ensure that the overall site sensitivities and constraints are fully considered before determining the spatial positioning and scale of the facilities and associated infrastructure that make up the overall Vanderkloof Solar PV and BESS Development. The GPS Coordinates for the for the various PV Facilities, onsite substations, battery energy storage systems (BESS) facility, and access road s(start, middle, and endpoint) will be provided in the revised application form and Draft Environmental Impact Report which will be submitted during the

		environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	Application form and Listed Activities: c) Activity 11(i): Please include reference to the onsite cabling.	The onsite cabling currently proposed is below the threshold of Activity 11(i)
	Application form and Listed Activities: d) Confirm whether Activity 19, Listing Notice 1, Activity 10, Listing Notice 3 is applicable.	Activity 19 of Listing Notice 1 and Activity 10, Listing Notice 3 have been included, as the preferred alternative layout has not yet been determined. Once the preferred alternative is determined and presented in the EIA phase of the Environmental Process a revised application form will be submitted to clarify the applicability of these activities.
	Application form and Listed Activities: e) Please ensure that the relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure as described in the project description. Please provide a full description of how the listed activity is triggered by the proposed development, including the threshold where necessary. Only activities applicable to the development must be applied for and assessed.	All relevant listed activities applied for are relevant and specific to the project description in relation to the proposed study area. A revised application form will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	Application form and Listed Activities: f) Carefully consider the triggers for Listing notice 3 activities. Please ensure that the provincial department confirms that the systematic biodiversity plans/bioregional plan have been adopted by the competent authority and confirms the development is within these areas. This information must be included in the amended application form and final SR to be submitted.	The Free State Biodiversity Sector Plan has been approved by the Free State Department of Economic, Small Business Development, Tourism and Environmental Affairs in October 2024. It is uncertain whether this plan has also been adopted as part of a bioregional plan in a provincial Gazette. The relevant state department and terrestrial biodiversity specialist will be engaged further during the Environmental Impact Assessment phase of the environmental process and the application form will be revised accordingly (should listed activities in listing notice 3 need to be excluded.)
	Application form and Listed Activities: g) If the activities applied for in the application form differ from those mentioned in the final SR, an amended application form must be submitted for final review and decision making. Please note that the Department's templates can be downloaded from the following link https://www.dffe.gov.za/forms .	The activities applied for in the application form and those reflected in the Draft and Final Scoping Report are the same. The application form submitted with the Draft Scoping Report will be revised during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	Alternatives: a) A description of the process followed to reach the preferred alternative within the site as per Appendix 2(1)(g) of the NEMA EIA Regulations 2014, as amended, must be incorporated into the final SR.	The site selection process and initial alternatives are outlined in section 2.10 and 2.11 of the Final Scoping Report. Please note that the preferred layout alternative will only be determined during the Environmental Impact Assessment Phase of the environmental process. This is to ensure that the outcome of the specialist site sensitivities and initial public participation process are used to inform the best practicable environmental option for the layout. The final preferred layout alternative will thus be presented and assessed in the Draft Environmental Impact Report.

	<p><u>Alternatives:</u> b) Please note that Appendix 2(2)(1)(g)(x) of the NEMA EIA Regulations, 2014, as amended, requires that “if no alternatives, including alternative locations for the activity were investigated, the motivation for not considering such” must be included in the SR. You are therefore required to provide motivation should other alternative sites, routes, layouts, and technologies not be considered.</p>	<p>As outlined above layout and technology alternatives are being investigated as part of the environmental process. Further details on the layout alternatives (including the determination of the preferred layout alternative) will be presented to the Department and I&AP's in the Draft Environmental Impact Report.</p>
	<p><u>Alternatives:</u> c) Ensure that the final SR includes the preferred technology for the Battery Energy Storage System (BESS).</p>	<p>The preferred Technology for the BESS is Vanadium Flow technologies. Please refer to section 2.5 of the final scoping report. Kindly note however, that the terms of reference for the BESS Risk Assessment is to consider all the listed BESS technologies. The preferred BESS technology may therefore change based on the outcome of the risk assessment.</p>
	<p><u>Alternatives:</u> d) A comparison table showing the project infrastructure and information would aid in assisting and highlighting similarities and differences between all the projects as part of the cluster.</p>	<p>The preferred layout alternatives for all the projects making up the cluster will determined and presented in the next phase of the environmental process. The EAP confirms that this information will be tabulated to allow for easy differentiation of the various projects forming part of the cluster.</p>

	<p>Layout & Sensitivity Maps:</p> <p>a) The final layout map must indicate the following (but not limited to the below):</p> <ul style="list-style-type: none"> • The PV/ BESS development area. • Final position of all infrastructure e.g., PV Panels, BESS, on-site substation, buildings etc. • Permanent laydown area footprint. • All supporting onsite infrastructure e.g., laydown areas, roads, (existing and proposed). • All existing infrastructure on the site. • The location of sensitive environmental features on site e.g., CBAs, ESAs, visually sensitive areas, heritage sites, wetlands, drainage lines etc. that will be affected. • Buffer areas recommended by specialists; and • All “no-go” areas. <p>b) Please ensure that the above map has a clear legend that communicates with details of the map.</p> <p>c) The above map must be overlain with a sensitivity map and a cumulative map.</p> <p>d) Images and Google maps will not be accepted for decision-making purposes.</p> <p>e) It must be emphasised that the final EIAR must include a final layout map which adheres to specialist recommendations as well as the identified no-go areas and buffer zones.</p> <p>f) Include a description of the process to determine the finalised layout i.e. specialist considerations, site sensitivities etc.</p> <p>g) Please include a separate appendix which contains all relevant mapping information. Ensure that clear, legible maps of high resolution are provided.</p>	<p>As indicated in the Draft Scoping Report, the preferred layout alternative will only be determined on completion of the scoping phase of the environmental process. This rationale was followed in order to allow for the outcome of the specialist SSVR's, and initial public participation process (including input from the competent authority)to inform the preferred layout alternative. The detailed site layout plan will be presented to the Competent Authority and Potential and Registered I&AP's as part of the Draft Environmental Impact Report.</p> <p>The Final Site Layout Map presented in the Draft EIR will comply with the content requirements outlined in the Departments Comment.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase:</p> <p>a) Specialist studies to be conducted must provide a detailed description of their methodology, as well as indicate the locations and descriptions of turbines, and all other associated infrastructures that they have assessed and are recommending for authorisations.</p>	<p>Please refer to section 6 of the Final Scoping Report (Plan of Study for Environmental Impact Assessment). This section identifies all specialist assessments that will take place during the Environmental Impact Assessment phase of the environmental process. It furthermore outlines the aspects that need to be considered and assessed by each of the specialists. The specialist assessments will be undertaken in compliance with the criteria listed in the plan of study for EIA in section 6 of the Final Scoping Report.</p>

	<p>Specialist Assessments to be conducted in the EIA Phase: b) The specialist studies must also provide a detailed description of all limitations to their studies. All specialist studies must be conducted in the right season and providing that as a limitation, will not be accepted.</p>	<p>The assumptions and limitations of the specialist reports are included in the respective reports attached in appendices E1 – E6 and have been summarized in sections 1.3.1 – 1.3.6 of the Final Scoping Report.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase: c) Should the appointed specialists specify contradicting recommendations, the EAP must clearly indicate the most reasonable recommendation and substantiate this with defensible reasons; and were necessary, include further expertise advice.</p>	<p>At this stage of the Environmental Process, no contradicting recommendations have been made by participating specialists and as such it has not been deemed necessary to obtain further expert advice.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase: d) It is further brought to your attention that Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for Environmental Authorisation, which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. “the Protocols”), and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal species), have come into effect. Please note that specialist assessments must be conducted in accordance with these protocols. Please note further that the protocols require the specialists’ to be registered with SACNASP in their respective field.</p>	<p>All relevant specialist studies (Terrestrial Biodiversity, Plant Species, Animal Species and Agriculture) will be undertaken in terms of the the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998. The EAP has verified that all specialists appointed are suitably experienced and qualified as well as appropriately registered with SACNASP.</p> <p>All relevant specialist studies will be undertaken in accordance with the protocols and details of compliance with the protocols will be included in the Draft Environmental Impact Report.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase: e) Please include a table in the report, summarising the specialist studies required by the Department’s Screening Tool, a column indicating whether these studies were conducted or not, and a column with motivation for any studies not conducted. Please note that if any of the specialists’ studies and requirements/protocols recommended in the Department’s Screening Tool are not commissioned, motivation for such must be provided in the report per the requirements of the Protocols.</p>	<p>Please refer to Table 18 in Section 3.4.17 of the Final Scoping Report which outlines the specialist studies identified in the screening tool along with confirmation as to which will be undertaken and which will not be undertaken (with motivation). In summary, the following specialist studies will be undertaken in the EIA phase of the Environmental Process:</p> <ul style="list-style-type: none"> - Agricultural Compliance Statement, - Landscape/Visual Impact Assessment, - Heritage Impact Assessment (including Cultural Heritage, Archaeology and Palaeontology), - Terrestrial Biodiversity Impact Assessment, - Aquatic Biodiversity Impact Assessment, - Avifaunal Impact Assessment, - Civil Aviation Compliance Statement (to be undertaken by EAP), - Defence Compliance Statement (to be undertaken by EAP), - Geotechnical Assessment, - Socio-Economic Impact Assessment, - Plant Species Compliance Statement, and - Animal Species Impact Assessment.

		<p>The only study listed in the screening tool report that will not be undertaken is the RFI Assessment. The Vanderkloof Solar PV and BESS Facilities fall outside of the Northern Cape Province and were furthermore found to be situated more than 156km from the closest Central Astronomy Advantage Area.</p> <p>The South African SKA Project Office and the South African Radio Astronomy Observatory (SARAO) have been registered as a key stakeholder on this environmental process and have been requested to provide input in terms of the Astronomy Geographic Advantage Act and potential impact to SKA.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u></p> <p>f) The screening tool output:</p> <ul style="list-style-type: none"> • The screening tool and the gazetted protocols (GN R320 of 20 March 2020 and GN R 1150 of 30 October 2020) require a site sensitivity verification to be completed to either confirm or dispute the findings and sensitivity ratings of the screening tool. • Site sensitivity verifications for all the identified specialist studies (according to the screening tool) must be provided. • It is the responsibility of the EAP to confirm the list of specialist assessments provided by the screening tool and to motivate in the assessment report, the reason for not including any of the identified specialist study including the provision of photographic evidence of the site situation. The site sensitivity verification for each of the recommended studies, as per the protocols, must be compiled and attached. If the findings of the site verification differed from the screening tool and was found to be of a different sensitivity level, then a compliance statement would be acceptable. 	<p>Please refer to Table 18 in Section 3.4.17 of the Final Scoping Report which outlines the specialist studies identified in the screening tool along with confirmation as to which will be undertaken and which will not be undertaken (with motivation). In summary, the following specialist studies will be undertaken in the EIA phase of the Environmental Process:</p> <ul style="list-style-type: none"> - Agricultural Compliance Statement, - Landscape/Visual Impact Assessment, - Heritage Impact Assessment (including Cultural Heritage, Archaeology and Palaeontology), - Terrestrial Biodiversity Impact Assessment, - Aquatic Biodiversity Impact Assessment, - Avifaunal Impact Assessment, - Civil Aviation Compliance Statement (to be undertaken by EAP), - Defense Compliance Statement (to be undertaken by EAP), - Geotechnical Assessment, - Socio-Economic Impact Assessment, - Plant Species Compliance Statement, and - Animal Species Impact Assessment. <p>The only study listed in the screening tool report that will not be undertaken is the RFI Assessment. The Vanderkloof Solar PV and BESS Facilities fall outside of the Northern Cape Province and were furthermore found to be situated more than 156km from the closest Central Astronomy Advantage Area.</p> <p>The South African SKA Project Office and the South African Radio Astronomy Observatory (SARAO) have been registered as a key stakeholder on this environmental process and have been requested to provide input in</p>

		<p>terms of the Astronomy Geographic Advantage Act and potential impact to SKA.</p> <p>The Site Sensitivity Verification is outlined in section 5.11 of the Final Scoping Report.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> g) Should the appointed specialists specify contradicting recommendations, the EAP must clearly indicate the most reasonable recommendation and substantiate this with defensible reasons; and where necessary, include further expert advice.</p>	<p>At this stage of the Environmental Process, no contradicting recommendations have been made by participating specialists and as such it has not been deemed necessary to obtain further expert advice.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> h) The avifauna and bat specialist studies must be conducted according to the latest BirdLife South Africa/Endangered Wildlife Trust: Best practice guidelines for avian monitoring and impact mitigation.</p>	<p>Bat Species assessments are generally not required for PV developments, unless the Animal Species theme in the screening tool or specialist identify the possible presence of sensitive Bat Species within the Project Area of Influence.</p> <p>The avifaunal impact assessment is being undertaken in terms of the best practice guidelines for birds and PV developments as produced by Birdlife South Africa. In this regard, the specialist has confirmed that a Regime 2 study in terms of these guidelines will be required for the proposed Vanderkloof Solar PV and BESS development.</p>
	<p><u>Public Participation Process:</u> a) Please ensure that comments from all relevant stakeholders are submitted to the Department with the final SR. This includes but not limited to the Department of Forestry, Fisheries, and the Environment (DFFE): Biodiversity Planning and Conservation (BCAdmin@dffe.gov.za); Provincial Department, South African Heritage Resources Agency (SAHRA), Thanda Tula Reserve; Tuinhoek Reserve, Protected Areas Directorate (tnethononda@dffe.gov.za for attention Mr Thivhulawi Nethononda), Water Sources and Wetlands Conservation Directorate (StanleyT@dffe.gov.za for attention Mr Stanley Tshitwamulomoni); Vulpro; South African Civil Aviation Authority, Birdlife South Africa, as well as the affected district and local municipalities.</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p> <p>The additional parties noted by the Department that did not form part of the initial public participation process have been added to the I&AP database and will be provided with an opportunity to comment on the Draft Environmental Impact Report.</p>
	<p><u>Public Participation Process:</u> b) Proof of correspondence with the various stakeholders must be included in the final SR. Should you be unable to obtain comments, proof must be submitted to the Department of the attempts that were made to obtain comments.</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p>
	<p><u>Public Participation Process:</u></p>	<p>The public participation is currently being undertaken in terms of Regulation 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014. Please refer to Table</p>

	<p>c) The Public Participation Process must be conducted in terms of Regulations 39, 40, 41, 42, 43 & 44 of the NEMA EIA Regulations 2014, as amended.</p>	<p>34 in section 7 of the Final Scoping Report for details of compliance with the abovementioned regulations. Section 7 of the Final Scoping Report should be read in conjunction with the following appendices:</p> <ul style="list-style-type: none"> - Appendix F1: I&AP register - Appendix F2: Comments and Responses Report - Appendix F3: Adverts and Site Notices - Appendix F4: Draft Scoping Report Notifications <p>Appendix F5: Draft Scoping Report Comments Received.</p>
	<p>Public Participation Process:</p> <p>d) The comments and response trail report (C&R) must be submitted with the final SR and subsequent documentation. The C&R report must incorporate all comments for this development. The C&R report must be a separate document from the main report and the format must be in the table format as indicated in Annexure 1 of this comments letter. Where necessary, comment received for specific projects must be clearly depicted.</p>	<p>A comments and responses report is Attached in Appendix F2 of the Final Scoping Report. This comments and responses report included all comments receive prior to submission of the Draft Scoping Report as well as comments received on the Draft Scoping Report and afterwards (up until the point of submission of the Final Scoping Report). This same comments and responses report will be further updated in the Draft Environmental Impact Report (in order to capture comments received between submission of the Final Scoping Report and Draft Environmental Impact Report) The Comment and responses report will be further updated on completion of the comment period on the Draft EIR.</p> <p>All comments have been captured verbatim and responded to individually. The Comments and Responses report is in the format proposed by the Department.</p>
	<p>Public Participation Process:</p> <p>e) Please ensure that all issues raised, and comments received during the circulation of the SR from registered I&APs and organs of state which have jurisdiction (including this Department's comments) in respect of the proposed activity are adequately addressed. Comments made by I&APs must be comprehensively captured (copy verbatim if required) and responded to clearly and fully. Please note that a response such as "Noted" is not regarded as an adequate response to I&AP's comments.</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p> <p>The additional parties noted by the Department that did not form part of the initial public participation process have been added to the I&AP database and will be provided with an opportunity to comment on the Draft Environmental Impact Report.</p>
	<p>Cumulative Assessments to be conducted in the EIA Phase:</p> <p>Should there be any other similar projects within a 30km radius of the proposed development site, the cumulative impact assessment for all identified and assessed impacts must be refined to indicate the following:</p> <ul style="list-style-type: none"> • Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e., hectares of cumulatively transformed land. 	<p>There are a number of projects that have been identified to have been authorized within a 30km radius of the proposed Vanderkloof PV and BESS development.</p> <p>Please refer to Appendix D1 Cluster Map showing proximity of Vanderkloof PV and BESS to other projects in the vicinity.</p> <p>The plan of study for EIA in section 6 of the Final Scoping Report as well as the Terms of Reference provided to specialists, require a detailed cumulative</p>

	<ul style="list-style-type: none"> • Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project. • The cumulative impacts significance rating must also inform the need and desirability of the proposed development. • A cumulative impact environmental statement on whether the proposed development must proceed. 	<p>impact assessment in compliance with the regulations as well as the criteria outlined in the Departments comment.</p>
	<p><u>Environmental Management Programme (EMPR):</u> a) The EMPr must include the following:</p> <ul style="list-style-type: none"> • It is drawn to your attention that for substation and overhead electricity transmission and distribution infrastructure, when such facilities trigger activity 11 or 47 of the Environmental Impact Assessment Regulations Listing Notice 1 of 2014, as amended, and any other listed and specified activities necessary for the realisation of such facilities, the generic Environmental Management Programme/s, must be signed and submitted with the final report over and above the EMPr for the facility. • Further to the above, you are required to comply with the content of the EMPr in terms of Appendix 4 of the Environmental Impact Assessment Regulations, 2014, as amended. • An alien invasive management plan to be implemented during construction and operation of the facility. The plan must include mitigation measures to reduce the invasion of alien species and ensure that the continuous monitoring and removal of alien species is undertaken. • A plant rescue and protection plan which allows for the maximum transplant of conservation important species from areas to be transformed. This plan must be compiled by a vegetation specialist familiar with the site and be implemented prior to commencement of the construction phase. • An avifauna monitoring and management plan to be implemented during the construction and operation of the facility. A suitably qualified avifauna specialist must draft this plan. • A re-vegetation and habitat rehabilitation plan to be implemented during the construction and operation of the facility. Restoration 	<p>An Environmental Management Programme containing all the content requirements outlined in the Departments comment will be included in the Draft Environmental Impact Report.</p>

	<p>must be undertaken as soon as possible after completion of construction activities to reduce the amount of habitat converted at any one time and to speed up the recovery to natural habitats.</p> <ul style="list-style-type: none">• An open space management plan to be implemented during the construction and operation of the facility.• A traffic management plan for the site access roads to ensure that no hazards would result from the increased truck traffic and that traffic flow would not be adversely impacted. This plan must include measures to minimize impacts on local commuters e.g. limiting construction vehicles travelling on public roadways during the morning and late afternoon commute time and avoid using roads through densely populated built-up areas so as not to disturb existing retail and commercial operations.• A transportation plan for the transport of components, main assembly cranes and other large pieces of equipment.• A storm water management plan to be implemented during the construction and operation of the facility. The plan must ensure compliance with applicable regulations and prevent off-site migration of contaminated storm water or increased soil erosion. The plan must include the construction of appropriate design measures that allow surface and subsurface movement of water along drainage lines so as not to impede natural surface and subsurface flows. Drainage measures must promote the dissipation of storm water run-off.• A fire management plan to be implemented during the construction and operation of the facility.• An erosion management plan for monitoring and rehabilitating erosion events associated with the facility. Appropriate erosion mitigation must form part of this plan to prevent and reduce the risk of any potential erosion.• An effective monitoring system to detect any leakage or spillage of all hazardous substances during their transportation, handling, use and storage. This must include precautionary measures to limit the possibility of oil and other toxic liquids from entering the soil or storm water systems.• Measures to protect hydrological features such as streams, rivers, pans, wetlands, dams and their catchments, and other	
--	---	--

	<p>environmental sensitive areas from construction impacts including the direct or indirect spillage of pollutants. The EAP must provide detailed motivation if any of the above requirements is not required by the proposed development and not included in the EMPr.</p>	
	<p>General: You are reminded to comply with Regulation 21(1) of the NEMA EIA Regulations 2014, as amended, which states that: "If S&EIR must be applied to an application, the applicant must, within 44 days of receipt of the application by the competent authority, submit to the competent authority a SR which has been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including any comments of the competent authority"</p>	<p>The Applicant and EAP are aware of the timeframes outlined in Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p> <p>The Draft Scoping Report was subjected to a 3 day comment period and this final Scoping Report is submitted within the allowable 44 days from receipt of the application form by the competent authority.</p> <p>According to the EAP's calculations, the 44 day period outlined in regulation 21(1) lapses on Wednesday 08 January 2025.</p>
	<p>General: You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of SRs in accordance with Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p>	<p>The Final Scoping Report submitted to the Department complies with the content requirements of Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p> <p>Please refer to the table on PDF page 11 of the Final Scoping Report which demonstrates compliance with Appendix 2 and Regulation 21(1).</p>
	<p>General: Further note that in terms of Regulation 45 of the NEMA EIA Regulations 2014, as amended, this application will lapse if the applicant fails to meet any of the timeframes prescribed in terms of these Regulations, unless an extension has been granted in terms of Regulation 3(7).</p>	<p>The requirements in terms of in terms of Regulation 45 of the EIA Regulations 2014, as amended are understood by both the applicant as well as the EAP.</p> <p>This Final Scoping Report has been submitted within the allowable timeframes and an extension granted in terms of Regulation 3(7) has not been required at this stage of the Environmental Process.</p>
	<p>General: You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.</p>	<p>The applicant and the EAP are aware of the requirements in Section 24F of the National Environmental Management Act and that the activities may not commence prior to an environmental Authorisation being granted by the Competent Authority.</p>
<p>20/11/2024 Email</p>	<p>Application form and Listed Activities: a) Please provide a contact person for the local Municipality in the application form.</p>	<p>The general enquiries email for Letsemeng Municipality will remain registered, as the EAP has been advised to lodge all request for comments through this email address (the Municipality will then forward to relevant</p>

<p>Department of Forestry, Fisheries and the Environment on Vanderkloof BESS 3 (14/12/16/3/3/2/2641) and Vanderkloof PV 3 (14/12/16/3/3/2/2646)</p>		<p>parties). In addition to this, the Municipal Manager, Mr Tshemedi Lucas Mkhwane has been added to the application form and the I&AP register.</p>
	<p>Application form and Listed Activities: b) Coordinates must be provided per facility and not the entire study site in the EIA phase. Coordinates must include locations of all proposed infrastructure for e.g. offices, substations, access roads, BESS etc.</p>	<p>For the purposes of the Scoping phase of the environmental process, the full extent of the study site is being considered. This is to ensure that the overall site sensitivities and constraints are fully considered before determining the spatial positioning and scale of the facilities and associated infrastructure that make up the overall Vanderkloof Solar PV and BESS Development.</p> <p>The GPS Coordinates for the for the various PV Facilities, onsite substations, battery energy storage systems (BESS) facility, and access roads(start, middle, and endpoint) will be provided in the revised application form and Draft Environmental Impact Report which will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.</p>
	<p>Application form and Listed Activities: c) Activity 11(i): Please include reference to the onsite cabling.</p>	<p>The onsite cabling currently proposed is below the threshold of Activity 11(i)</p>
	<p>Application form and Listed Activities: d) Confirm whether Activity 19, Listing Notice 1, Activity 10, Listing Notice 3 is applicable.</p>	<p>Activity 19 of Listing Notice 1 and Activity 10, Listing Notice 3 have been included, as the preferred alternative layout has not yet been determined. Once the preferred alternative is determined and presented in the EIA phase of the Environmental Process a revised application form will be submitted to clarify the applicability of these activities.</p>
	<p>Application form and Listed Activities: e) Please ensure that the relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure as described in the project description. Please provide a full description of how the listed activity is triggered by the proposed development, including the threshold where necessary. Only activities applicable to the development must be applied for and assessed.</p>	<p>All relevant listed activities applied for are relevant and specific to the project description in relation to the proposed study area. A revised application form will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.</p>
<p>Application form and Listed Activities: f) Carefully consider the triggers for Listing notice 3 activities. Please ensure that the provincial department confirms that the systematic biodiversity plans/bioregional plan have been adopted by the competent authority and confirms the development is within these areas. This information must be included in the amended application form and final SR to be submitted.</p>	<p>The Free State Biodiversity Sector Plan has been approved by the Free State Department of Economic, Small Business Development, Tourism and Environmental Affairs in October 2024. It is uncertain whether this plan has also been adopted as part of a bioregional plan in a provincial Gazette. The relevant state department and terrestrial biodiversity specialist will be engaged further during the Environmental Impact Assessment phase of the environmental process and the application form will be revised accordingly (should listed activities in listing notice 3 need to be excluded.)</p>	

	<p>Application form and Listed Activities: g) You are required to confirm whether the competent authority adopts systematic biodiversity plans or bioregional plans. There are certain activities in Listing Notice 3 that requires that Bioregional Plans to be adopted.</p>	<p>The Free State Biodiversity Sector Plan has been approved by the Free State Department of Economic, Small Business Development, Tourism and Environmental Affairs in October 2024. It is uncertain whether this plan has also been adopted as part of a bioregional plan in a provincial Gazette. The relevant state department and terrestrial biodiversity specialist will be engaged further during the Environmental Impact Assessment phase of the environmental process and the application form will be revised accordingly (should listed activities in listing notice 3 need to be excluded.)</p>
	<p>Application form and Listed Activities: h) If the activities applied for in the application form differ from those mentioned in the final SR, an amended application form must be submitted for final review and decision making. Please note that the Department's templates can be downloaded from the following link https://www.dffe.gov.za/forms.</p>	<p>The activities applied for in the application form and those reflected in the Draft and Final Scoping Report are the same. The application form submitted with the Draft Scoping Report will be revised during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.</p>
	<p>Alternatives: a) A description of the process followed to reach the preferred alternative within the site as per Appendix 2(1)(g) of the NEMA EIA Regulations 2014, as amended, must be incorporated into the final SR.</p>	<p>The site selection process and initial alternatives are outlined in section 2.10 and 2.11 of the Final Scoping Report. Please note that the preferred layout alternative will only be determined during the Environmental Impact Assessment Phase of the environmental process. This is to ensure that the outcome of the specialist site sensitivities and initial public participation process are used to inform the best practicable environmental option for the layout. The final preferred layout alternative will thus be presented and assessed in the Draft Environmental Impact Report.</p>
	<p>Alternatives: b) Please note that Appendix 2(2)(1)(g)(x) of the NEMA EIA Regulations, 2014, as amended, requires that "if no alternatives, including alternative locations for the activity were investigated, the motivation for not considering such" must be included in the SR. You are therefore required to provide motivation should other alternative sites, routes, layouts, and technologies not be considered.</p>	<p>As outlined above layout and technology alternatives are being investigated as part of the environmental process. Further details on the layout alternatives (including the determination of the preferred layout alternative) will be presented to the Department and I&AP's in the Draft Environmental Impact Report.</p>
	<p>Alternatives: c) Ensure that the final SR includes the preferred technology for the Battery Energy Storage System (BESS).</p>	<p>The preferred Technology for the BESS is Vanadium Flow technologies. Please refer to section 2.5 of the final scoping report. Kindly note however, that the terms of reference for the BESS Risk Assessment is to consider all the listed BESS technologies. The preferred BESS technology may therefore change based on the outcome of the risk assessment.</p>
	<p>Alternatives: d) A comparison table showing the project infrastructure and information would aid in assisting and highlighting similarities and differences between all the projects as part of the cluster.</p>	<p>The preferred layout alternatives for all the projects making up the cluster will determined and presented in the next phase of the environmental process. The EAP confirms that this information will be tabulated to allow for easy differentiation of the various projects forming part of the cluster.</p>

	<p>Layout & Sensitivity Maps</p> <p>a) The final layout map must indicate the following (but not limited to the below):</p> <ul style="list-style-type: none"> • The PV/ BESS development area. • Final position of all infrastructure e.g., PV Panels, BESS, on-site substation, buildings etc. • Permanent laydown area footprint. • All supporting onsite infrastructure e.g., laydown areas, roads, (existing and proposed). • All existing infrastructure on the site. • The location of sensitive environmental features on site e.g., CBAs, ESAs, visually sensitive areas, heritage sites, wetlands, drainage lines etc. that will be affected. • Buffer areas recommended by specialists; and • All “no-go” areas. <p>b) Please ensure that the above map has a clear legend that communicates with details of the map.</p> <p>c) The above map must be overlain with a sensitivity map and a cumulative map.</p> <p>d) Images and Google maps will not be accepted for decision-making purposes.</p> <p>e) It must be emphasised that the final EIAR must include a final layout map which adheres to specialist recommendations as well as the identified no-go areas and buffer zones.</p> <p>f) Include a description of the process to determine the finalised layout i.e. specialist considerations, site sensitivities etc.</p> <p>g) Please include a separate appendix which contains all relevant mapping information. Ensure that clear, legible maps of high resolution are provided.</p>	<p>As indicated in the Draft Scoping Report, the preferred layout alternative will only be determined on completion of the scoping phase of the environmental process. This rationale was followed in order to allow for the outcome of the specialist SSVR's, and initial public participation process (including input from the competent authority)to inform the preferred layout alternative. The detailed site layout plan will be presented to the Competent Authority and Potential and Registered I&AP's as part of the Draft Environmental Impact Report.</p> <p>The requirements outlined in the Departments comments will be incorporated into the final site layout plans.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase:</p> <p>a) Specialist studies to be conducted must provide a detailed description of their methodology, as well as indicate the locations and descriptions of turbines, and all other associated infrastructures that they have assessed and are recommending for authorisations.</p>	<p>At the current phase of the Environmental Impact Assessment Process, specialists are considering the full extent of the study site in order to identify sensitive areas as well as constraints and opportunities for the proposed development. The outcome of the Scoping Level Studies and Site Sensitivity Verifications and the outcome of the initial public participation process will be used to inform the preferred layouts for each of the proposed facilities. These layouts will be presented in the Environmental Impact Assessment phase of</p>

		<p>the environmental process and all specialists will be required to assess the all aspects of the project in detail. As agreed upon with the Department, separate chapters (assessments) will be undertaken for each of the projects making up the greater Vanderkloof PV and BESS development. The Methodology applied by each of the specialists is outlined in the respective specialist reports attached in Appendices E1 – E6.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> b) The specialist studies must also provide a detailed description of all limitations to their studies. All specialist studies must be conducted in the right season and providing that as a limitation, will not be accepted.</p>	<p>The assumptions and limitations of the specialist reports are included in the respective reports attached in appendices E1 – E6 and have been summarized in sections 1.3.1 – 1.3.6 of the Final Scoping Report.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> c) Should the appointed specialists specify contradicting recommendations, the EAP must clearly indicate the most reasonable recommendation and substantiate this with defensible reasons; and were necessary, include further expertise advice.</p>	<p>At this stage of the Environmental Process, no contradicting recommendations have been made by participating specialists and as such it has not been deemed necessary to obtain further expert advice.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> d) It is further brought to your attention that Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for Environmental Authorisation, which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. “the Protocols”), and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal species), have come into effect. Please note that specialist assessments must be conducted in accordance with these protocols. Please note further that the protocols require the specialists’ to be registered with SACNASP in their respective field.</p>	<p>All relevant specialist studies (Terrestrial Biodiversity, Plant Species, Animal Species and Agriculture) will be undertaken in terms of the the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998. The EAP has verified that all specialists appointed are suitably experienced and qualified as well as appropriately registered with SACNASP.</p> <p>All relevant specialist studies will be undertaken in accordance with the protocols and details of compliance with the protocols will be included in the Draft Environmental Impact Report.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> e) Please include a table in the report, summarising the specialist studies required by the Department’s Screening Tool, a column indicating whether these studies were conducted or not, and a column with motivation for any studies not conducted. Please note that if any of the specialists’ studies and requirements/protocols recommended in the Department’s Screening Tool are not commissioned, motivation for such must be provided in the report per the requirements of the Protocols.</p>	<p>Please refer to Table 18 in Section 3.4.17 of the Final Scoping Report which outlines the specialist studies identified in the screening tool along with confirmation as to which will be undertaken and which will not be undertaken (with motivation). In summary, the following specialist studies will be undertaken in the EIA phase of the Environmental Process:</p> <ul style="list-style-type: none"> - Agricultural Compliance Statement, - Landscape/Visual Impact Assessment, - Heritage Impact Assessment (including Cultural Heritage, Archaeology and Palaeontology), - Terrestrial Biodiversity Impact Assessment, - Aquatic Biodiversity Impact Assessment, - Avifaunal Impact Assessment, - Civil Aviation Compliance Statement (to be undertaken by EAP),

		<ul style="list-style-type: none"> - Defense Compliance Statement (to be undertaken by EAP), - Geotechnical Assessment, - Socio-Economic Impact Assessment, - Plant Species Compliance Statement, and - Animal Species Impact Assessment. <p>The only study listed in the screening tool report that will not be undertaken is the RFI Assessment. The Vanderkloof Solar PV and BESS Facilities fall outside of the Northern Cape Province and were furthermore found to be situated more than 156km from the closest Central Astronomy Advantage Area.</p> <p>The South African SKA Project Office and the South African Radio Astronomy Observatory (SARAO) have been registered as a key stakeholder on this environmental process and have been requested to provide input in terms of the Astronomy Geographic Advantage Act and potential impact to SKA.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u></p> <p>f) The screening tool output:</p> <ul style="list-style-type: none"> • The screening tool and the gazetted protocols (GN R320 of 20 March 2020 and GN R 1150 of 30 October 2020) require a site sensitivity verification to be completed to either confirm or dispute the findings and sensitivity ratings of the screening tool. • Site sensitivity verifications for all the identified specialist studies (according to the screening tool) must be provided. • It is the responsibility of the EAP to confirm the list of specialist assessments provided by the screening tool and to motivate in the assessment report, the reason for not including any of the identified specialist study including the provision of photographic evidence of the site situation. The site sensitivity verification for each of the recommended studies, as per the protocols, must be compiled and attached. If the findings of the site verification differed from the screening tool and was found to be of a different sensitivity level, then a compliance statement would be acceptable. 	<p>Please refer to Table 18 in Section 3.4.17 of the Final Scoping Report which outlines the specialist studies identified in the screening tool along with confirmation as to which will be undertaken and which will not be undertaken (with motivation). In summary, the following specialist studies will be undertaken in the EIA phase of the Environmental Process:</p> <ul style="list-style-type: none"> - Agricultural Compliance Statement, - Landscape/Visual Impact Assessment, - Heritage Impact Assessment (including Cultural Heritage, Archaeology and Palaeontology), - Terrestrial Biodiversity Impact Assessment, - Aquatic Biodiversity Impact Assessment, - Avifaunal Impact Assessment, - Civil Aviation Compliance Statement (to be undertaken by EAP), - Defense Compliance Statement (to be undertaken by EAP), - Geotechnical Assessment, - Socio-Economic Impact Assessment, - Plant Species Compliance Statement, and - Animal Species Impact Assessment. <p>The only study listed in the screening tool report that will not be undertaken is the RFI Assessment. The Vanderkloof Solar PV and BESS Facilities fall outside of the Northern Cape Province and were furthermore found to be</p>

		<p>situated more than 156km from the closest Central Astronomy Advantage Area.</p> <p>The South African SKA Project Office and the South African Radio Astronomy Observatory (SARAO) have been registered as a key stakeholder on this environmental process and have been requested to provide input in terms of the Astronomy Geographic Advantage Act and potential impact to SKA.</p> <p>The Site Sensitivity Verification is outlined in section 5.11 of the Final Scoping Report.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> g) Should the appointed specialists specify contradicting recommendations, the EAP must clearly indicate the most reasonable recommendation and substantiate this with defensible reasons; and were necessary, include further expertise advice.</p>	<p>At this stage of the Environmental Process, no contradicting recommendations have been made by participating specialists and as such it has not been deemed necessary to obtain further expert advice.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> h) The avifauna and bat specialist studies must be conducted according to the latest BirdLife South Africa/Endangered Wildlife Trust: Best practice guidelines for avian monitoring and impact mitigation.</p>	<p>Bat Species assessments are generally not required for PV developments, unless the Animal Species theme in the screening tool or specialist identify the possible presence of sensitive Bat Species within the Project Area of Influence.</p> <p>The avifaunal impact assessment is being undertaken in terms of the best practice guidelines for birds and PV developments as produced by Birdlife South Africa. In this regard, the specialist has confirmed that a Regime 2 study in terms of these guidelines will be required for the proposed Vanderkloof Solar PV and BESS development.</p>
	<p><u>Public Participation Process:</u> a) Please ensure that comments from all relevant stakeholders are submitted to the Department with the final SR. This includes but not limited to the Department of Forestry, Fisheries, and the Environment (DFFE): Biodiversity Planning and Conservation (BCAdmin@dffe.gov.za); Provincial Department, South African Heritage Resources Agency (SAHRA), Thanda Tula Reserve; Tuinhoek Reserve, Protected Areas Directorate (tnethononda@dffe.gov.za for attention Mr Thivhulawi Nethononda), Water Sources and Wetlands Conservation Directorate (StanleyT@dffe.gov.za for attention Mr Stanley Tshitwamulomoni); Vulpro; South African Civil Aviation Authority, Birdlife South Africa, as well as the affected district and local municipalities.</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p> <p>The additional parties noted by the Department that did not form part of the initial public participation process have been added to the I&AP database and will be provided with an opportunity to comment on the Draft Environmental Impact Report.</p>
	<p><u>Public Participation Process:</u> b) Proof of correspondence with the various stakeholders must be included in the final SR. Should you be unable to obtain comments, proof must be</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all</p>

	submitted to the Department of the attempts that were made to obtain comments.	comments received as well as the responses thereto is included in Appendix F2.
	<p><u>Public Participation Process:</u> c) The Public Participation Process must be conducted in terms of Regulations 39, 40, 41, 42, 43 & 44 of the NEMA EIA Regulations 2014, as amended.</p>	<p>The public participation is currently being undertaken in terms of Regulation 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014. Please refer to Table 34 in section 7 of the Final Scoping Report for details of compliance with the abovementioned regulations. Section 7 of the Final Scoping Report should be read in conjunction with the following appendices:</p> <ul style="list-style-type: none"> - Appendix F1: I&AP register - Appendix F2: Comments and Responses Report - Appendix F3: Adverts and Site Notices - Appendix F4: Draft Scoping Report Notifications - Appendix F5: Draft Scoping Report Comments Received.
	<p><u>Public Participation Process:</u> d) The comments and response trail report (C&R) must be submitted with the final SR and subsequent documentation. The C&R report must incorporate all comments for this development. The C&R report must be a separate document from the main report and the format must be in the table format as indicated in Annexure 1 of this comments letter. Where necessary, comment received for specific projects must be clearly depicted.</p>	<p>A comments and responses report is Attached in Appendix F2 of the Final Scoping Report. This comments and responses report included all comments receive prior to submission of the Draft Scoping Report as well as comments received on the Draft Scoping Report and afterwards (up until the point of submission of the Final Scoping Report). This same comments and responses report will be further updated in the Draft Environmental Impact Report (in order to capture comments received between submission of the Final Scoping Report and Draft Environmental Impact Report) The Comment and responses report will be further updated on completion of the comment period on the Draft EIR.</p> <p>All comments have been captured verbatim and responded to individually. The Comments and Responses report is in the format proposed by the Department.</p>
	<p><u>Public Participation Process:</u> e) Please ensure that all issues raised, and comments received during the circulation of the SR from registered I&APs and organs of state which have jurisdiction (including this Department's comments) in respect of the proposed activity are adequately addressed. Comments made by I&APs must be comprehensively captured (copy verbatim if required) and responded to clearly and fully. Please note that a response such as "Noted" is not regarded as an adequate response to I&AP's comments.</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p> <p>The additional parties noted by the Department that did not form part of the initial public participation process have been added to the I&AP database and will be provided with an opportunity to comment on the Draft Environmental Impact Report.</p>

	<p>Cumulative Assessments to be conducted in the EIA Phase: Should there be any other similar projects within a 30km radius of the proposed development site, the cumulative impact assessment for all identified and assessed impacts must be refined to indicate the following:</p> <ul style="list-style-type: none"> • Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e., hectares of cumulatively transformed land. • Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project. • The cumulative impacts significance rating must also inform the need and desirability of the proposed development. • A cumulative impact environmental statement on whether the proposed development must proceed. 	<p>There are a number of projects that have been identified to have been authorized within a 30km radius of the proposed Vanderkloof PV and BESS development.</p> <p>Please refer to Appendix D1 Cluster Map showing proximity of Vanderkloof PV and BESS to other projects in the vicinity.</p> <p>The plan of study for EIA in section 6 of the Final Scoping Report as well as the Terms of Reference provided to specialists, require a detailed cumulative impact assessment in compliance with the regulations as well as the criteria outlined in the Departments comment.</p>
	<p>Environmental Management Programme (EMPr):</p> <p>a) The EMPr must include the following:</p> <ul style="list-style-type: none"> • It is drawn to your attention that for substation and overhead electricity transmission and distribution infrastructure, when such facilities trigger activity 11 or 47 of the Environmental Impact Assessment Regulations Listing Notice 1 of 2014, as amended, and any other listed and specified activities necessary for the realisation of such facilities, the generic Environmental Management Programme/s, must be signed and submitted with the final report over and above the EMPr for the facility. • Further to the above, you are required to comply with the content of the EMPr in terms of Appendix 4 of the Environmental Impact Assessment Regulations, 2014, as amended. <p>b) The EMPr must consider the following, and where possible, include:</p> <ul style="list-style-type: none"> • An alien invasive management plan to be implemented during construction and operation of the facility. The plan must include mitigation measures to reduce the invasion of alien species and ensure that the continuous monitoring and removal of alien species is undertaken. • A plant rescue and protection plan which allows for the maximum transplant of conservation important species from areas to be 	<p>An Environmental Management Programme containing all the content requirements outlined in the Departments comment will be included in the Draft Environmental Impact Report.</p>

	<p>transformed. This plan must be compiled by a vegetation specialist familiar with the site and be implemented prior to commencement of the construction phase.</p> <ul style="list-style-type: none">• An avifauna monitoring and management plan to be implemented during the construction and operation of the facility. A suitably qualified avifauna specialist must draft this plan.• A re-vegetation and habitat rehabilitation plan to be implemented during the construction and operation of the facility. Restoration must be undertaken as soon as possible after completion of construction activities to reduce the amount of habitat converted at any one time and to speed up the recovery to natural habitats.• An open space management plan to be implemented during the construction and operation of the facility.• A traffic management plan for the site access roads to ensure that no hazards would result from the increased truck traffic and that traffic flow would not be adversely impacted. This plan must include measures to minimize impacts on local commuters e.g. limiting construction vehicles travelling on public roadways during the morning and late afternoon commute time and avoid using roads through densely populated built-up areas so as not to disturb existing retail and commercial operations.• A transportation plan for the transport of components, main assembly cranes and other large pieces of equipment.• A storm water management plan to be implemented during the construction and operation of the facility. The plan must ensure compliance with applicable regulations and prevent off-site migration of contaminated storm water or increased soil erosion. The plan must include the construction of appropriate design measures that allow surface and subsurface movement of water along drainage lines so as not to impede natural surface and subsurface flows. Drainage measures must promote the dissipation of storm water run-off.• A fire management plan to be implemented during the construction and operation of the facility.• An erosion management plan for monitoring and rehabilitating erosion events associated with the facility. Appropriate erosion mitigation must form part of this plan to prevent and reduce the risk of any potential erosion.	
--	--	--

	<ul style="list-style-type: none"> • An effective monitoring system to detect any leakage or spillage of all hazardous substances during their transportation, handling, use and storage. This must include precautionary measures to limit the possibility of oil and other toxic liquids from entering the soil or storm water systems. • Measures to protect hydrological features such as streams, rivers, pans, wetlands, dams and their catchments, and other environmental sensitive areas from construction impacts including the direct or indirect spillage of pollutants. • The EAP must provide detailed motivation if any of the above requirements is not required by the proposed development and not included in the EMPr. 	
	<p>General: You are reminded to comply with Regulation 21(1) of the NEMA EIA Regulations 2014, as amended, which states that: "If S&EIR must be applied to an application, the applicant must, within 44 days of receipt of the application by the competent authority, submit to the competent authority a SR which has been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including any comments of the competent authority"</p>	<p>The Applicant and EAP are aware of the timeframes outlined in Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p> <p>The Draft Scoping Report was subjected to a 3 day comment period and this final Scoping Report is submitted within the allowable 44 days from receipt of the application form by the competent authority.</p> <p>According to the EAP's calculations, the 44 day period outlined in regulation 21(1) lapses on Wednesday 08 January 2025.</p>
	<p>General: You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of SRs in accordance with Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p>	<p>The Final Scoping Report submitted to the Department complies with the content requirements of Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p> <p>Please refer to the table on PDF page 11 of the Final Scoping Report which demonstrates compliance with Appendix 2 and Regulation 21(1).</p>
	<p>General: Further note that in terms of Regulation 45 of the NEMA EIA Regulations 2014, as amended, this application will lapse if the applicant fails to meet any of the timeframes prescribed in terms of these Regulations, unless an extension has been granted in terms of Regulation 3(7).</p>	<p>The requirements in terms of in terms of Regulation 45 of the EIA Regulations 2014, as amended are understood by both the applicant as well as the EAP.</p> <p>This Final Scoping Report has been submitted within the allowable timeframes and an extension granted in terms of Regulation 3(7) has not been required at this stage of the Environmental Process.</p>
	<p>General: You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.</p>	<p>The applicant and the EAP are aware of the requirements in Section 24F of the National Environmental Management Act and that the activities may not commence prior to an environmental Authorisation being granted by the Competent Authority.</p>

<p>20/11/2024 Email Department of Forestry, Fisheries and the Environment on Vanderkloof BESS 4 (14/12/16/3/3/2/2642)</p>	<p>Application Form: a) Please note that the Minister is the competent authority for applications for facilities or infrastructure, which will form part of the Integrated Resource Plan (IRP) Programmes for technologies whose procurement processes have been determined under the Electricity Regulation Act, 2006 and / or the Electricity Regulations on New Generation Capacity. If the applicant will not, or does not intend to, participate in any of the IRP programmes, the competent authority will be the MEC responsible for environmental affairs in the respective province. Be advised that this information must be clearly presented in Section 1 –Competent Authority in the application form.</p>	<p>The applicant intends participating in the Battery Energy Storage Independent Power Producers Procurement Programme (BESIPPP) as part of the IRP under determination in the Energy Regulation Act. The Minister is therefore deemed to be the Competent Authority in respect of this application. This has been clarified in the Final scoping report as well as the revised application form attached in Appendix I.</p>
	<p>Application Form: b) Reflecting the above, the reasons provided in Section 1 of the application form for this Department being the Competent Authority in terms of S24C of NEMA are incomplete. This must be rectified and expanded on in the application form as well as the report. Please refer to GN 779.</p>	<p>The reasons provided in section 1 of the Application form were based on an IQ (IQ 2023/253) issued by the Department on 26 September 2023. This was further clarified via email correspondence with Mr Coenrad Agenbach of the Department on 24 January 2024. This has been clarified in the report and revised application form attached as Appendix I. According to GN 779, the Minister is the competent authority for all activities related to the IRP 2010 – 2030. Please note that the application form will need to be further revised once the final preferred layout alternative is determined in the Environmental Impact Assessment Phase of the Environmental process.</p>
	<p>Application Form: c) Please provide a contact person for the local Municipality in the application form.</p>	<p>The general enquiries email for Letsemeng Municipality will remain registered, as the EAP has been advised to lodge all request for comments through this email address (the Municipality will then forward to relevant parties). In addition to this, the Municipal Manager, Mr Tshemedi Lucas Mkhwane has been added to the application form and the I&AP register.</p>
	<p>Application Form: d) Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure (including thresholds) as described in the project description. Only activities (and sub-activities) applicable to the development must be applied for and assessed moving forward.</p>	<p>All relevant listed activities applied for are relevant and specific to the project description in relation to the proposed study area. A revised application form will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.</p>
	<p>Application Form: e) Ensure that the SG codes, all farm names and numbers and the EAP's contact details are correct. The farm names and SG codes must be clearly differentiated for the grid infrastructure and the PV facility infrastructure.</p>	<p>The property descriptions and SG codes for the PV projects as reflected in the application form and Draft Scoping are confirmed to be correct. Kindly note, that the current application only includes the IPP substation, which is proposed to be situated on the same properties as the PV development. The grid connection infrastructure is being applied for via a separate</p>

		environmental application, which will be administered by the Provincial Authority.
	Application Form: f) Include the GPS Coordinates for the onsite substation, battery energy storage system (BESS) facility, and access road (start, middle, and endpoint).	The GPS Coordinates for the onsite substation, battery energy storage system (BESS) facility, and access road (start, middle, and endpoint) will be provided in the revised application form which will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	Listed Activities: a) It is noted that the proposed solar facility does not fall within the Renewable Energy Development Zone (REDZ) as per GN 114, as such this application will be considered as a normal EIA application.	It is confirmed that all of the proposed Vanderkloof PV and BESS applications fall outside of the promulgated Renewable Energy Development Zones (REDZ). All of the projects forming part of the Vanderkloof PV and BESS development require Authorisation of activities listed in listing notice 2 of the 2014 EIA regulations (as amended) and as such will be subjected to a Scoping and Environmental Impact Reporting Process.
	Listed Activities: b) Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure (including thresholds) as described in the project description. Only activities (and sub-activities) applicable to the development must be applied for and assessed.	All relevant listed activities applied for are relevant and specific to the project description in relation to the proposed study area. A revised application form will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	Listed Activities: c) Activity 27 of Listing Notice 1: Clarify whether this activity is only relevant to clearance of indigenous area for the Pv/ or onsite substation/ or BESS. Include the threshold of total indigenous vegetated area to be cleared.	This activity is associated with the total clearance of vegetation associated with the Vanderkloof BESS 1 project and includes, the BESS, on site substation and laydown area. The total clearance of vegetation in respect of the Vanderkloof BESS 1 project will be approximately 12ha (the exact extent of indigenous vegetation clearance will be determined during the environmental impact assessment phase of the environmental process, once the preferred layout alternatives are determined.
	Listed Activities: d) You are required to confirm whether the competent authority adopts systematic biodiversity plans or bioregional plans. There are certain activities in Listing Notice 3 that requires that Bioregional Plans to be adopted.	The Free State Biodiversity Sector Plan has been approved by the Free State Department of Economic, Small Business Development, Tourism and Environmental Affairs in October 2024. It is uncertain whether this plan has also been adopted as part of a bioregional plan in a provincial Gazette. The relevant state department and terrestrial biodiversity specialist will be engaged further during the Environmental Impact Assessment phase of the environmental process and the application form will be revised accordingly (should listed activities in listing notice 3 need to be excluded.)
	Listed Activities: e) It is imperative that the relevant authorities are continuously involved throughout the environmental impact assessment process, as the development property possibly falls within geographically designated areas in terms of Listing Notice 3 Activities. Written comments must be obtained from	Proof of correspondence with Registered I&AP's, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.

	<p>the relevant authorities (or proof of consultation if no comments were received) and submitted to this Department. In addition, a graphical representation of the proposed development within the respective geographical areas must be provided. Please also ensure that the potential impacts on the affected Critical Biodiversity Areas and Ecological Support Areas are fully assessed in the final Environmental Impact Assessment Report (EIAR).</p>	<p>The additional parties noted by the Department that did not form part of the initial public participation process have been added to the I&AP database and will be provided with an opportunity to comment on the Draft Environmental Impact Report.</p>
	<p>Listed Activities: f) If the activities applied for in the application form differ from those mentioned in the final SR, an amended application form must be submitted. Please note that the Department's application form template has been amended and can be downloaded from the following link https://www.dffe.gov.za/documents/forms.</p>	<p>The activities applied for in the application form and those reflected in the Draft and Final Scoping Report are the same. The application form submitted with the Draft Scoping Report will be revised during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.</p>
	<p>The draft Layout & Sensitivity Maps: Please provide a layout map which indicates the following: a) The entire location of the one 1000MWh BESS facility (known as Vanderkloof BESS 4).</p>	<p>As indicated in the Draft Scoping Report, the preferred layout alternative will only be determined on completion of the scoping phase of the environmental process. This rationale was followed in order to allow for the outcome of the specialist SSVR's, and initial public participation process (including input from the competent authority)to inform the preferred layout alternative. The detailed site layout plan will be presented to the Competent Authority and Potential and Registered I&AP's as part of the Draft Environmental Impact Report.</p>
	<p>The draft Layout & Sensitivity Maps: Please provide a layout map which indicates the following: b) The location of the associated infrastructure which includes the following:</p> <ul style="list-style-type: none"> • An up to 8ha electrolyte tank footprint or solid-state containerized battery area with interspersed internal roads, cabling routes, and energy management system (EMS) modules. • On-site substation (~2ha). • Temporary laydown areas which will not exceed 1ha and will be situated within the assessed footprint. • Permanent laydown areas (~0.3ha). • Permanent auxiliary buildings (~0.5ha) that includes guardhouses, workshops, operations and control centres, Offices, and accommodation. • Temporary accommodation buildings with associated canteens and ablutions of up to 0.1ha. <p>c) Access roads – 8m wide and ~14km long (8.5km existing, 3km existing with upgrades required, 2.5km to be constructed). d) Perimeter fencing not exceeding 3m in height.</p>	<p>As indicated in the Draft Scoping Report, the preferred layout alternative will only be determined on completion of the scoping phase of the environmental process. This rationale was followed in order to allow for the outcome of the specialist SSVR's, and initial public participation process (including input from the competent authority)to inform the preferred layout alternative. The detailed site layout plan will be presented to the Competent Authority and Potential and Registered I&AP's as part of the Draft Environmental Impact Report.</p> <p>The final site layout plan will incorporate all the requirements outlined in the Departments Comment. This final Site Layout Plan will be presented to the Department and I&AP's as part of the Draft Environmental Impact Report.</p>

	<p>e) Rainwater tanks. f) Diesel tanks (up to 80m3 for the entire Vanderkloof Solar PV and BESS Facilities). g) The location of sensitive environmental features on site e.g., CBAs, heritage sites, wetlands, drainage lines etc. that will be affected; h) Buffer areas; and All “no-go” areas. i) The above map must be overlain with a sensitivity map and a cumulative map which shows neighbouring renewable energy developments and existing grid infrastructure.</p>	
	<p>Public Participation Process: a) Please ensure that all issues raised, and comments received on the draft SR from registered I&APs and organs of state which have jurisdiction (including this Department’s Biodiversity Section: BCAdmin@dffe.gov.za, the provincial authority and the local municipality) in respect of the proposed activity are adequately addressed in the final SR. Proof of correspondence with the various stakeholders must be included in the final SR. Should you be unable to obtain comments, proof must be submitted to the Department of the attempts that were made to obtain comments.</p>	<p>Proof of correspondence with Registered I&AP’s, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p>
	<p>Public Participation Process: b) The Public Participation Process must be conducted in terms of the approved public participation plan and Regulation 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014, as amended. Take note of the timeframes required for adequate public participation.</p>	<p>The public participation is currently being undertaken in terms of Regulation 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014. Please refer to Table 34 in section 7 of the Final Scoping Report for details of compliance with the abovementioned regulations. Section 7 of the Final Scoping Report should be read in conjunction with the following appendices:</p> <ul style="list-style-type: none"> - Appendix F1: I&AP register - Appendix F2: Comments and Responses Report - Appendix F3: Adverts and Site Notices - Appendix F4: Draft Scoping Report Notifications - Appendix F5: Draft Scoping Report Comments Received.
	<p>Public Participation Process: c) A comments and response trail report (C&R) must be submitted with the final SR. The C&R report must incorporate all historical comments (pre and post submission of the draft SR) for this development. The C&R report must be a separate document from the main report and the format must be in the table format which reflects the details of the I&APs and date of comments received, actual comments received, and response provided. Please ensure that comments made by I&APs are comprehensively captured (copy verbatim if required) and responded to clearly and fully. Please note that a response</p>	<p>A comments and responses report is Attached in Appendix F2 of the Final Scoping Report. This comments and responses report included all comments receive prior to submission of the Draft Scoping Report as well as comments received on the Draft Scoping Report and afterwards (up until the point of submission of the Final Scoping Report). This same comments and responses report will be further updated in the Draft Environmental Impact Report (in order to capture comments received between submission of the Final Scoping Report and Draft Environmental Impact Report) The Comment and responses report will be further updated on completion of the comment period on the Draft EIR.</p>

	<p>such as “Noted” is not regarded as an adequate response to I&AP’s comments.</p>	<p>All comments have been captured verbatim and responded to individually. The Comments and Responses report is in the format proposed by the Department.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> a) The EAP must ensure that all required specialist studies for the project are identified and recommended.</p>	<p>Please refer to section 6 of the Final Scoping Report (Plan of Study for Environmental Impact Assessment). This section identifies all specialist assessments that will take place during the Environmental Impact Assessment phase of the environmental process. It furthermore outlines the aspects that need to be considered and assessed by each of the specialists.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> b) Specialist studies to be conducted must provide a detailed description of their methodology, as well as indicate the locations and descriptions of PV arrays, and all other associated infrastructures that they have assessed and are recommending for authorisations.</p>	<p>At the current phase of the Environmental Impact Assessment Process, specialists are considering the full extent of the study site in order to identify sensitive areas as well as constraints and opportunities for the proposed development. The outcome of the Scoping Level Studies and Site Sensitivity Verifications and the outcome of the initial public participation process will be used to inform the preferred layouts for each of the proposed facilities. These layouts will be presented in the Environmental Impact Assessment phase of the environmental process and all specialists will be required to assess the all aspects of the project in detail. As agreed upon with the Department, separate chapters (assessments) will be undertaken for each of the projects making up the greater Vanderkloof PV and BESS development. The Methodology applied by each of the specialists is outlined in the respective specialist reports attached in Appendices E1 – E6.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> c) It is further brought to your attention that Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for Environmental Authorisation, which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. “the Protocols”), and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal species), have come into effect. Please note that specialist assessments must be conducted in accordance with these protocols. Please note further that the protocols require the specialists’ to be registered with SACNASP in their respective field.</p>	<p>All relevant specialist studies (Terrestrial Biodiversity, Plant Species, Animal Species and Agriculture) will be undertaken in terms of the the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998. The EAP has verified that all specialists appointed are suitably experienced and qualified as well as appropriately registered with SACNASP.</p> <p>All relevant specialist studies will be undertaken in accordance with the protocols and details of compliance with the protocols will be included in the Draft Environmental Impact Report.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> d) Please include a table in the report, summarising the specialist studies required by the Department’s Screening Tool, a column indicating whether these studies were conducted or not, and a column with motivation for any studies not conducted. Please note that if any of the specialists’ studies and requirements/protocols recommended in the Department’s Screening Tool are</p>	<p>Please refer to Table 18 in Section 3.4.17 of the Final Scoping Report which outlines the specialist studies identified in the screening tool along with confirmation as to which will be undertaken and which will not be undertaken (with motivation). In summary, the following specialist studies will be undertaken in the EIA phase of the Environmental Process:</p> <ul style="list-style-type: none"> - Agricultural Compliance Statement, - Landscape/Visual Impact Assessment,

	<p>not commissioned, motivation for such must be provided in the report per the requirements of the Protocols.</p>	<ul style="list-style-type: none"> - Heritage Impact Assessment (including Cultural Heritage, Archaeology and Palaeontology), - Terrestrial Biodiversity Impact Assessment, - Aquatic Biodiversity Impact Assessment, - Avifaunal Impact Assessment, - Civil Aviation Compliance Statement (to be undertaken by EAP), - Defense Compliance Statement (to be undertaken by EAP), - Geotechnical Assessment, - Socio-Economic Impact Assessment, - Plant Species Compliance Statement, and - Animal Species Impact Assessment. <p>The only study listed in the screening tool report that will not be undertaken is the RFI Assessment. The Vanderkloof Solar PV and BESS Facilities fall outside of the Northern Cape Province and were furthermore found to be situated more than 156km from the closest Central Astronomy Advantage Area.</p> <p>The South African SKA Project Office and the South African Radio Astronomy Observatory (SARAO) have been registered as a key stakeholder on this environmental process and have been requested to provide input in terms of the Astronomy Geographic Advantage Act and potential impact to SKA.</p>
	<p><u>Cumulative Assessments to be conducted in the EIA Phase:</u> Should there be any other similar projects within a 20km radius of the proposed development site, the cumulative impact assessment for all identified and assessed impacts must be refined to indicate the following:</p> <ul style="list-style-type: none"> • Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e., hectares of cumulatively transformed land. • Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project. • The cumulative impacts significance rating must also inform the need and desirability of the proposed development. 	<p>There are a number of projects that have been identified to have been authorized within a 20km radius of the proposed Vanderkloof PV and BESS development.</p> <p>Please refer to Appendix D1 Cluster Map showing proximity of Vanderkloof PV and BESS to other projects in the vicinity.</p> <p>The plan of study for EIA in section 6 of the Final Scoping Report as well as the Terms of Reference provided to specialists, require a detailed cumulative impact assessment in compliance with the regulations as well as the criteria outlined in the Departments comment.</p>

	<ul style="list-style-type: none"> • A cumulative impact environmental statement on whether the proposed development must proceed. <p>General: You are further reminded to comply with Regulation 21(1) of the NEMA EIA Regulations 2014, as amended, which states that: "If S&EIR must be applied to an application, the applicant must, within 44 days of receipt of the application by the competent authority, submit to the competent authority a SR which has been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including any comments of the competent authority".</p> <p>General: You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of SRs in accordance with Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p> <p>General: Further note that in terms of Regulation 45 of the EIA Regulations 2014, as amended, this application will lapse if the applicant fails to meet any of the timeframes prescribed in terms of these Regulations, unless an extension has been granted in terms of Regulation 3(7).</p> <p>General: You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.</p>	<p>The Applicant and EAP are aware of the timeframes outlined in Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p> <p>The Draft Scoping Report was subjected to a 3 day comment period and this final Scoping Report is submitted within the allowable 44 days from receipt of the application form by the competent authority.</p> <p>According to the EAP's calculations, the 44 day period outlined in regulation 21(1) lapses on Wednesday 08 January 2025.</p> <p>The Final Scoping Report submitted to the Department complies with the content requirements of Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p> <p>Please refer to the table on PDF page 11 of the Final Scoping Report which demonstrates compliance with Appendix 2 and Regulation 21(1).</p> <p>The requirements in terms of in terms of Regulation 45 of the EIA Regulations 2014, as amended are understood by both the applicant as well as the EAP.</p> <p>This Final Scoping Report has been submitted within the allowable timeframes and an extension granted in terms of Regulation 3(7) has not been required at this stage of the Environmental Process.</p> <p>The applicant and the EAP are aware of the requirements in Section 24F of the National Environmental Management Act and that the activities may not commence prior to an environmental Authorisation being granted by the Competent Authority.</p>
<p>20/11/2024 Email Department of Forestry, Fisheries and the Environment on Vanderkloof PV 1 (14/12/16/3/3/2/2644)</p>	<p>Application Form: a) Please note that the Minister is the competent authority for applications for facilities or infrastructure, that will form part of the Integrated Resource Plan (IRP) Programmes for technologies whose procurement processes have been determined under the Electricity Regulation Act, 2006 and / or the Electricity Regulations on New Generation Capacity. If the applicant will not, or does not intend to, participate in any of the IRP programmes, the competent authority will be the MEC responsible for environmental affairs in the respective</p>	<p>The applicant intends participating in the Battery Energy Storage Independent Power Producers Procurement Programme (BESIPPP) as part of the IRP under determination in the Energy Regulation Act. The Minister is therefore deemed to be the Competent Authority in respect of this application. This has been clarified in the Final scoping report as well as the revised application form attached in Appendix I.</p>

	<p>province. Be advised that this this information must be clearly presented in Section 1 –Competent Authority in the application form.</p>	
	<p>Application Form: b) Reflecting the above, the reasons provided in Section 1 of the application form for this Department being the Competent Authority in terms of S24C of NEMA are incomplete. This must be rectified and expanded on in the application form as well as the report. Please refer to GN 779.</p>	<p>The reasons provided in section 1 of the Application form were based on an IQ (IQ 2023/253) issued by the Department on 26 September 2023. This was further clarified via email correspondence with Mr Coenrad Agenbach of the Department on 24 January 2024. This has been clarified in the report and revised application form attached as Appendix I. According to GN 779, the Minister is the competent authority for all activities related to the IRP 2010 – 2030. Please note that the application form will need to be further revised once the final preferred layout alternative is determined in the Environmental Impact Assessment Phase of the Environmental process.</p>
	<p>Application Form: c) Please provide a contact person for the local Municipality in the application form.</p>	<p>The general enquiries email for Letsemeng Municipality will remain registered, as the EAP has been advised to lodge all request for comments through this email address (the Municipality will then forward to relevant parties). In addition to this, the Municipal Manager, Mr Tshemedi Lucas Mkhwane has been added to the application form and the I&AP register.</p>
	<p>Application Form: d) Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure (including thresholds) as described in the project description. Only activities (and sub-activities) applicable to the development must be applied for and assessed moving forward.</p>	<p>The listed activities applied for in the application form and those considered in the scoping report are specific to the proposed development in respect of the development proposal in respect of the study site currently proposed. A revised application form will be submitted during the EIA phase of the environmental process, once the preferred layout alternative is determined.</p>
	<p>Application Form: e) Ensure that the SG codes, all farm names and numbers and the EAP's contact details are correct. The farm names and SG codes must be clearly differentiated for the grid infrastructure and the PV facility infrastructure.</p>	<p>The property descriptions and SG codes for the PV projects as reflected in the application form and Draft Scoping are confirmed to be correct. Kindly note, that the current application only includes the IPP substation, which is proposed to be situated on the same properties as the PV development. The grid connection infrastructure is being applied for via a separate environmental application, which will be administered by the Provincial Authority.</p>
	<p>Application Form: f) Include the GPS Coordinates for the onsite substation, battery energy storage system (BESS) facility, and access road (start, middle, and endpoint).</p>	<p>For the purposes of the Scoping phase of the environmental process, the full extent of the study site is being considered. This is to ensure that the overall site sensitivities and constraints are fully considered before determining the spatial positioning and scale of the facilities and associated infrastructure that make up the overall Vanderkloof Solar PV and BESS Development.</p> <p>The GPS Coordinates for the for the various PV Facilities, onsite substations, battery energy storage systems (BESS) facility, and access road s(start, middle, and endpoint) will be provided in the revised application form and Draft Environmental Impact Report which will be submitted during the</p>

		environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	<p>Listed Activities: a) It is noted that the proposed solar facility does not fall within the Renewable Energy Development Zone (REDZ) as per GN 114, as such this application will be considered as a normal EIA application.</p>	It is confirmed that all of the proposed Vanderkloof PV and BESS applications fall outside of the promulgated Renewable Energy Development Zones (REDZ). All of the projects forming part of the Vanderkloof PV and BESS development require Authorisation of activities listed in listing notice 2 of the 2014 EIA regulations (as amended) and as such will be subjected to a Scoping and Environmental Impact Reporting Process.
	<p>Listed Activities: b) Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure (including thresholds) as described in the project description. Only activities (and sub-activities) applicable to the development must be applied for and assessed.</p>	All relevant listed activities applied for are relevant and specific to the project description in relation to the proposed study area. A revised application form will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	<p>Listed Activities: c) Activity 27 of Listing Notice 1: Clarify whether this activity is only relevant to clearance of indigenous area for the Pv/ or onsite substation/ or BESS. Include the threshold of total indigenous vegetated area to be cleared.</p>	This activity is associated with the total clearance of vegetation associated with the Vanderkloof BESS 1 project and includes, the BESS, on site substation and laydown area. The total clearance of vegetation in respect of the Vanderkloof BESS 1 project will be approximately 12ha (the exact extent of indigenous vegetation clearance will be determined during the environmental impact assessment phase of the environmental process, once the preferred layout alternatives are determined.
	<p>Listed Activities: d) You are required to confirm whether systematic biodiversity plans or bioregional plans are adopted by the competent authority. There are certain activities in Listing Notice 3 that requires that Bioregional Plans to be adopted.</p>	The Free State Biodiversity Sector Plan has been approved by the Free State Department of Economic, Small Business Development, Tourism and Environmental Affairs in October 2024. It is uncertain whether this plan has also been adopted as part of a bioregional plan in a provincial Gazette. The relevant state department and terrestrial biodiversity specialist will be engaged further during the Environmental Impact Assessment phase of the environmental process and the application form will be revised accordingly (should listed activities in listing notice 3 need to be excluded.)
	<p>Listed Activities: e) It is imperative that the relevant authorities are continuously involved throughout the environmental impact assessment process, as the development property possibly falls within geographically designated areas in terms of Listing Notice 3 Activities. Written comments must be obtained from the relevant authorities (or proof of consultation if no comments were received) and submitted to this Department. In addition, a graphical representation of the proposed development within the respective geographical areas must be provided. Please also ensure that the potential impacts on the affected Critical Biodiversity Areas and Ecological Support Areas are fully assessed in the final Environmental Impact Assessment Report (EIAR).</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p> <p>The additional parties noted by the Department that did not form part of the initial public participation process have been added to the I&AP database and will be provided with an opportunity to comment on the Draft Environmental Impact Report.</p>

	<p>Listed Activities: f) If the activities applied for in the application form differ from those mentioned in the final SR, an amended application form must be submitted. Please note that the Department's application form template has been amended and can be downloaded from the following link https://www.dffe.gov.za/documents/forms.</p>	<p>The activities applied for in the application form and those reflected in the Draft and Final Scoping Report are the same. The application form submitted with the Draft Scoping Report will be revised during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.</p>
	<p>The draft Layout & Sensitivity Maps: Please provide a layout map which indicates the following: a) The entire location of the Vanderkloof PV1. b) The location of the associated infrastructure which includes the following:</p> <ul style="list-style-type: none"> • On-site substation (~2ha). • Temporary laydown areas which will not exceed 4ha and will be situated within the assessed footprint. • Permanent laydown areas (~1ha). • Permanent auxiliary buildings (~0.5ha) that includes guardhouses, workshops, operations and control centres, Offices, and accommodation. • Temporary accommodation buildings with associated canteens and ablutions of up to 0.2ha. <p>c) Access roads – 8m wide and ~14km long (8.5km existing, 3km existing with upgrades required, 2.5km to be constructed). d) Perimeter fencing not exceeding 3m in height. e) Rainwater tanks. f) Diesel tanks (up to 80m³ for the entire Vanderkloof Solar PV and BESS Facilities). g) The location of sensitive environmental features on site e.g., CBAs, heritage sites, wetlands, drainage lines etc. that will be affected; h) Buffer areas; and All “no-go” areas. i) The above map must be overlain with a sensitivity map and a cumulative map which shows neighbouring renewable energy developments and existing grid infrastructure.</p>	<p>As indicated in the Draft Scoping Report, the preferred layout alternative will only be determined on completion of the scoping phase of the environmental process. This rationale was followed in order to allow for the outcome of the specialist SSVR's, and initial public participation process (including input from the competent authority)to inform the preferred layout alternative. The detailed site layout plan will be presented to the Competent Authority and Potential and Registered I&AP's as part of the Draft Environmental Impact Report.</p> <p>This Final Site Layout Plan inclusive of the content requirements outlined by the Department will be presented as part of the Draft Environmental Impact Report.</p>
	<p>Public Participation Process: a) Please ensure that all issues raised, and comments received on the draft SR from registered I&APs and organs of state which have jurisdiction (including this Department's Biodiversity Section: BCAdmin@dffe.gov.za, the provincial authority and the local municipality) in respect of the proposed activity are adequately addressed in the final SR. Proof of correspondence with the various stakeholders must be included in the final SR. Should you be</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p>

	unable to obtain comments, proof must be submitted to the Department of the attempts that were made to obtain comments.	
	<p>Public Participation Process: b) The Public Participation Process must be conducted in terms of the approved public participation plan and Regulation 39, 40, 41, 42, 43 & 44 of the NEMA EIA Regulations 2014, as amended. Take note of the timeframes required for adequate public participation.</p>	<p>The public participation is currently being undertaken in terms of Regulation 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014. Please refer to Table 34 in section 7 of the Final Scoping Report for details of compliance with the abovementioned regulations. Section 7 of the Final Scoping Report should be read in conjunction with the following appendices:</p> <ul style="list-style-type: none"> - Appendix F1: I&AP register - Appendix F2: Comments and Responses Report - Appendix F3: Adverts and Site Notices - Appendix F4: Draft Scoping Report Notifications <p>Appendix F5: Draft Scoping Report Comments Received.</p>
	<p>Public Participation Process: c) A comments and response trail report (C&R) must be submitted with the final SR. The C&R report must incorporate all historical comments (pre and post submission of the draft SR) for this development. The C&R report must be a separate document from the main report and the format must be in the table format which reflects the details of the I&APs and date of comments received, actual comments received, and response provided. Please ensure that comments made by I&APs are comprehensively captured (copy verbatim if required) and responded to clearly and fully. Please note that a response such as "Noted" is not regarded as an adequate response to I&AP's comments.</p>	<p>A comments and responses report is Attached in Appendix F2 of the Final Scoping Report. This comments and responses report included all comments receive prior to submission of the Draft Scoping Report as well as comments received on the Draft Scoping Report and afterwards (up until the point of submission of the Final Scoping Report). This same comments and responses report will be further updated in the Draft Environmental Impact Report (in order to capture comments received between submission of the Final Scoping Report and Draft Environmental Impact Report) The Comment and responses report will be further updated on completion of the comment period on the Draft EIR. All comments have been captured verbatim and responded to individually. The Comments and Responses report is in the format proposed by the Department.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase: a) The EAP must ensure that all required specialist studies for the project are identified and recommended.</p>	<p>Please refer to section 6 of the Final Scoping Report (Plan of Study for Environmental Impact Assessment). This section identifies all specialist assessments that will take place during the Environmental Impact Assessment phase of the environmental process. It furthermore outlines the aspects that need to be considered and assessed by each of the specialists.</p>
	<p>Specialist Assessments to be conducted in the EIA Phase: b) Specialist studies to be conducted must provide a detailed description of their methodology, as well as indicate the locations and descriptions of PV arrays, and all other associated infrastructures that they have assessed and are recommending for authorisations.</p>	<p>At the current phase of the Environmental Impact Assessment Process, specialists are considering the full extent of the study site in order to identify sensitive areas as well as constraints and opportunities for the proposed development. The outcome of the Scoping Level Studies and Site Sensitivity Verifications and the outcome of the initial public participation process will be used to inform the preferred layouts for each of the proposed facilities. These layouts will be presented in the Environmental Impact Assessment phase of the environmental process and all specialists will be required to assess the</p>

		<p>all aspects of the project in detail. As agreed upon with the Department, separate chapters (assessments) will be undertaken for each of the projects making up the greater Vanderkloof PV and BESS development. The Methodology applied by each of the specialists is outlined in the respective specialist reports attached in Appendices E1 – E6.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> c) It is further brought to your attention that Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for Environmental Authorisation, which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. “the Protocols”), and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal species), have come into effect. Please note that specialist assessments must be conducted in accordance with these protocols. Please note further that the protocols require the specialists’ to be registered with SACNASP in their respective field.</p>	<p>All relevant specialist studies (Terrestrial Biodiversity, Plant Species, Animal Species and Agriculture) will be undertaken in terms of the the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998. The EAP has verified that all specialists appointed are suitably experienced and qualified as well as appropriately registered with SACNASP.</p> <p>All relevant specialist studies will be undertaken in accordance with the protocols and details of compliance with the protocols will be included in the Draft Environmental Impact Report.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> d) Please include a table in the report, summarising the specialist studies required by the Department’s Screening Tool, a column indicating whether these studies were conducted or not, and a column with motivation for any studies not conducted. Please note that if any of the specialists’ studies and requirements/protocols recommended in the Department’s Screening Tool are not commissioned, motivation for such must be provided in the report per the requirements of the Protocols.</p>	<p>Please refer to Table 18 in Section 3.4.17 of the Final Scoping Report which outlines the specialist studies identified in the screening tool along with confirmation as to which will be undertaken and which will not be undertaken (with motivation). In summary, the following specialist studies will be undertaken in the EIA phase of the Environmental Process:</p> <ul style="list-style-type: none"> - Agricultural Compliance Statement, - Landscape/Visual Impact Assessment, - Heritage Impact Assessment (including Cultural Heritage, Archaeology and Palaeontology), - Terrestrial Biodiversity Impact Assessment, - Aquatic Biodiversity Impact Assessment, - Avifaunal Impact Assessment, - Civil Aviation Compliance Statement (to be undertaken by EAP), - Defense Compliance Statement (to be undertaken by EAP), - Geotechnical Assessment, - Socio-Economic Impact Assessment, - Plant Species Compliance Statement, and - Animal Species Impact Assessment. <p>The only study listed in the screening tool report that will not be undertaken is the RFI Assessment. The Vanderkloof Solar PV and BESS Facilities fall outside of the Northern Cape Province and were furthermore found to be</p>

		<p>situated more than 156km from the closest Central Astronomy Advantage Area.</p> <p>The South African SKA Project Office and the South African Radio Astronomy Observatory (SARAO) have been registered as a key stakeholder on this environmental process and have been requested to provide input in terms of the Astronomy Geographic Advantage Act and potential impact to SKA.</p>
	<p><u>Cumulative Assessments to be conducted in the EIA Phase:</u> Should there be any other similar projects within a 20km radius of the proposed development site, the cumulative impact assessment for all identified and assessed impacts must be refined to indicate the following:</p> <ul style="list-style-type: none"> • Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e., hectares of cumulatively transformed land. • Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project. • The cumulative impacts significance rating must also inform the need and desirability of the proposed development. • A cumulative impact environmental statement on whether the proposed development must proceed. 	<p>There are a number of projects that have been identified to have been authorized within a 20km radius of the proposed Vanderkloof PV and BESS development.</p> <p>Please refer to Appendix D1 Cluster Map showing proximity of Vanderkloof PV and BESS to other projects in the vicinity.</p> <p>The plan of study for EIA in section 6 of the Final Scoping Report as well as the Terms of Reference provided to specialists, require a detailed cumulative impact assessment in compliance with the regulations as well as the criteria outlined in the Departments comment.</p>
	<p><u>General:</u> You are further reminded to comply with Regulation 21(1) of the NEMA EIA Regulations 2014, as amended, which states that: "If S&EIR must be applied to an application, the applicant must, within 44 days of receipt of the application by the competent authority, submit to the competent authority a SR which has been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including any comments of the competent authority".</p>	<p>The Applicant and EAP are aware of the timeframes outlined in Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p> <p>The Draft Scoping Report was subjected to a 3 day comment period and this final Scoping Report is submitted within the allowable 44 days from receipt of the application form by the competent authority.</p> <p>According to the EAP's calculations, the 44 day period outlined in regulation 21(1) lapses on Wednesday 08 January 2025.</p>
	<p><u>General:</u> You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment</p>	<p>The Final Scoping Report submitted to the Department complies with the content requirements of Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p>

	and content of SRs in accordance with Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.	Please refer to the table on PDF page 11 of the Final Scoping Report which demonstrates compliance with Appendix 2 and Regulation 21(1).
	<p>General: Further note that in terms of Regulation 45 of the EIA Regulations 2014, as amended, this application will lapse if the applicant fails to meet any of the timeframes prescribed in terms of these Regulations, unless an extension has been granted in terms of Regulation 3(7).</p>	<p>The requirements in terms of in terms of Regulation 45 of the EIA Regulations 2014, as amended are understood by both the applicant as well as the EAP.</p> <p>This Final Scoping Report has been submitted within the allowable timeframes and an extension granted in terms of Regulation 3(7) has not been required at this stage of the Environmental Process.</p>
	<p>General: You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.</p>	<p>The applicant and the EAP are aware of the requirements in Section 24F of the National Environmental Management Act and that the activities may not commence prior to an environmental Authorisation being granted by the Competent Authority.</p>
<p>20/11/2024 Email Department of Forestry, Fisheries and the Environment on Vanderkloof PV 4 (14/12/16/3/3/2/2647)</p>	<p>Application Form: a) Please note that the Minister is the competent authority for applications for facilities or infrastructure, which will form part of the Integrated Resource Plan (IRP) Programmes for technologies whose procurement processes have been determined under the Electricity Regulation Act, 2006 and / or the Electricity Regulations on New Generation Capacity. If the applicant will not, or does not intend to, participate in any of the IRP programmes, the competent authority will be the MEC responsible for environmental affairs in the respective province. Be advised that this this information must be clearly presented in Section 1 –Competent Authority in the application form.</p>	<p>The applicant intends participating in the Battery Energy Storage Independent Power Producers Procurement Programme (BESIPPP) as part of the IRP under determination in the Energy Regulation Act. The Minister is therefore deemed to be the Competent Authority in respect of this application. This has been clarified in the Final scoping report as well as the revised application form attached in Appendix I.</p>
	<p>Application Form: b) Reflecting the above, the reasons provided in Section 1 of the application form for this Department being the Competent Authority in terms of S24C of NEMA are incomplete. This must be rectified and expanded on in the application form as well as the report. Please refer to GN 779.</p>	<p>The reasons provided in section 1 of the Application form were based on an IQ (IQ 2023/253) issued by the Department on 26 September 2023. This was further clarified via email correspondence with Mr Coenrad Agenbach of the Department on 24 January 2024. This has been clarified in the report and revised application form attached as Appendix I. According to GN 779, the Minister is the competent authority for all activities related to the IRP 2010 – 2030. Please note that the application form will need to be further revised once the final preferred layout alternative is determined in the Environmental Impact Assessment Phase of the Environmental process.</p>
	<p>Application Form: c) Please provide a contact person for the local Municipality in the application form.</p>	<p>The general enquiries email for Letsemeng Municipality will remain registered, as the EAP has been advised to lodge all request for comments through this email address (the Municipality will then forward to relevant</p>

		parties). In addition to this, the Municipal Manager, Mr Tshemedi Lucas Mkhwane has been added to the application form and the I&AP register.
	<p>Application Form: d) Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure (including thresholds) as described in the project description. Only activities (and sub-activities) applicable to the development must be applied for and assessed moving forward.</p>	All relevant listed activities applied for are relevant and specific to the project description in relation to the proposed study area. A revised application form will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.
	<p>Application Form: e) Ensure that the SG codes, all farm names and numbers and the EAP's contact details are correct. The farm names and SG codes must be clearly differentiated for the grid infrastructure and the PV facility infrastructure.</p>	The property descriptions and SG codes for the PV projects as reflected in the application form and Draft Scoping are confirmed to be correct. Kindly note, that the current application only includes the IPP substation, which is proposed to be situated on the same properties as the PV development. The grid connection infrastructure is being applied for via a separate environmental application, which will be administered by the Provincial Authority.
	<p>Application Form: f) Include the GPS Coordinates for the onsite substation, battery energy storage system (BESS) facility, and access road (start, middle, and endpoint).</p>	<p>For the purposes of the Scoping phase of the environmental process, the full extent of the study site is being considered. This is to ensure that the overall site sensitivities and constraints are fully considered before determining the spatial positioning and scale of the facilities and associated infrastructure that make up the overall Vanderkloof Solar PV and BESS Development.</p> <p>The GPS Coordinates for the for the various PV Facilities, onsite substations, battery energy storage systems (BESS) facility, and access road s(start, middle, and endpoint) will be provided in the revised application form and Draft Environmental Impact Report which will be submitted during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.</p>
	<p>Listed Activities: a) It is noted that the proposed solar facility does not fall within the Renewable Energy Development Zone (REDZ) as per GN 114, as such this application will be considered as a normal EIA application.</p>	It is confirmed that all of the proposed Vanderkloof PV and BESS applications fall outside of the promulgated Renewable Energy Development Zones (REDZ). All of the projects forming part of the Vanderkloof PV and BESS development require Authorisation of activities listed in listing notice 2 of the 2014 EIA regulations (as amended) and as such will be subjected to a Scoping and Environmental Impact Reporting Process.
	<p>Listed Activities: b) Please ensure that all relevant listed activities are applied for, are specific and can be linked to the development activity or infrastructure (including thresholds) as described in the project description. Only activities (and sub-activities) applicable to the development must be applied for and assessed.</p>	The listed activities applied for in the application form and those considered in the scoping report are specific to the proposed development in respect of the development proposal in respect of the study site currently proposed. A revised application form will be submitted during the EIA phase of the environmental process, once the preferred layout alternative is determined.

	<p>Listed Activities: c) Activity 27 of Listing Notice 1: Clarify whether this activity is only relevant to clearance of indigenous area for the PV/ or onsite substation/ or BESS. Include the threshold of total indigenous vegetated area to be cleared.</p>	<p>This activity is associated with the total clearance of vegetation associated with the Vanderkloof BESS 1 project and includes, the BESS, on site substation and laydown area. The total clearance of vegetation in respect of the Vanderkloof BESS 1 project will be approximately 12ha (the exact extent of indigenous vegetation clearance will be determined during the environmental impact assessment phase of the environmental process, once the preferred layout alternatives are determined.</p>
	<p>Listed Activities: d) You are required to confirm whether the competent authority adopts systematic biodiversity plans or bioregional plans. There are certain activities in Listing Notice 3 that requires that Bioregional Plans to be adopted.</p>	<p>The Free State Biodiversity Sector Plan has been approved by the Free State Department of Economic, Small Business Development, Tourism and Environmental Affairs in October 2024. It is uncertain whether this plan has also been adopted as part of a bioregional plan in a provincial Gazette. The relevant state department and terrestrial biodiversity specialist will be engaged further during the Environmental Impact Assessment phase of the environmental process and the application form will be revised accordingly (should listed activities in listing notice 3 need to be excluded.)</p>
	<p>Listed Activities: e) It is imperative that the relevant authorities are continuously involved throughout the environmental impact assessment process, as the development property possibly falls within geographically designated areas in terms of Listing Notice 3 Activities. Written comments must be obtained from the relevant authorities (or proof of consultation if no comments were received) and submitted to this Department. In addition, a graphical representation of the proposed development within the respective geographical areas must be provided. Please also ensure that the potential impacts on the affected Critical Biodiversity Areas and Ecological Support Areas are fully assessed in the final Environmental Impact Assessment Report (EIAR).</p>	<p>Proof of correspondence with Registered I&AP's, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p> <p>The additional parties noted by the Department that did not form part of the initial public participation process have been added to the I&AP database and will be provided with an opportunity to comment on the Draft Environmental Impact Report.</p>
	<p>Listed Activities: f) If the activities applied for in the application form differ from those mentioned in the final SR, an amended application form must be submitted. Please note that the Department's application form template has been amended and can be downloaded from the following link https://www.dffe.gov.za/documents/forms.</p>	<p>The activities applied for in the application form and those reflected in the Draft and Final Scoping Report are the same. The application form submitted with the Draft Scoping Report will be revised during the environmental impact assessment phase of the environmental process, once the preferred layout alternative is determined.</p>

	<p><u>The draft Layout & Sensitivity Maps:</u> Please provide a layout map which indicates the following:</p> <p>a) The entire location of the Vanderkloof PV4.</p> <p>b) The location of the associated infrastructure which includes the following:</p> <ul style="list-style-type: none"> • On-site substation (~2ha). • Temporary laydown areas which will not exceed 4ha and will be situated within the assessed footprint. • Permanent laydown areas (~1ha). • Permanent auxiliary buildings (~0.5ha) that includes guardhouses, workshops, operations and control centres, Offices, and accommodation. • Temporary accommodation buildings with associated canteens and ablutions of up to 0.2ha. <p>c) Access roads – 8m wide and ~14km long (8.5km existing, 3km existing with upgrades required, 2.5km to be constructed).</p> <p>d) Perimeter fencing not exceeding 3m in height.</p> <p>e) Rainwater tanks.</p> <p>f) Diesel tanks (up to 80m3 for the entire Vanderkloof Solar PV and BESS Facilities).</p> <p>g) The location of sensitive environmental features on site e.g., CBAs, heritage sites, wetlands, drainage lines etc. that will be affected;</p> <p>h) Buffer areas; and All “no-go” areas.</p> <p>i) The above map must be overlain with a sensitivity map and a cumulative map which shows neighbouring renewable energy developments and existing grid infrastructure.</p>	<p>As indicated in the Draft Scoping Report, the preferred layout alternative will only be determined on completion of the scoping phase of the environmental process. This rationale was followed in order to allow for the outcome of the specialist SSVR’s, and initial public participation process (including input from the competent authority)to inform the preferred layout alternative. The detailed site layout plan will be presented to the Competent Authority and Potential and Registered I&AP’s as part of the Draft Environmental Impact Report.</p> <p>The Final Site Layout Plan incorporating the Departments Comments will be presented as part of the Draft Environmental Impact Report.</p>
	<p><u>Public Participation Process:</u></p> <p>a) Please ensure that all issues raised, and comments received on the draft SR from registered I&APs and organs of state which have jurisdiction (including this Department’s Biodiversity Section: BCAdmin@dffe.gov.za, the provincial authority and the local municipality) in respect of the proposed activity are adequately addressed in the final SR. Proof of correspondence with the various stakeholders must be included in the final SR. Should you be unable to obtain comments, proof must be submitted to the Department of the attempts that were made to obtain comments.</p>	<p>Proof of correspondence with Registered I&AP’s, State Departments and Organs of State (including the Departments, Biodiversity Conservation directorate) is attached in Appendix F4. All comments received are included in Appendix F5. A comments and responses report containing all comments received as well as the responses thereto is included in Appendix F2.</p>
	<p><u>Public Participation Process:</u></p> <p>b) The Public Participation Process must be conducted in terms of the approved public participation plan and Regulation 39, 40, 41, 42, 43 & 44 of</p>	<p>The public participation is currently being undertaken in terms of Regulation 39, 40, 41, 42, 43 & 44 of the EIA Regulations 2014. Please refer to Table 34 in section 7 of the Final Scoping Report for details of compliance with the</p>

	<p>the EIA Regulations 2014, as amended. Take note of the timeframes required for adequate public participation.</p>	<p>abovementioned regulations. Section 7 of the Final Scoping Report should be read in conjunction with the following appendices:</p> <ul style="list-style-type: none"> - Appendix F1: I&AP register - Appendix F2: Comments and Responses Report - Appendix F3: Adverts and Site Notices - Appendix F4: Draft Scoping Report Notifications - Appendix F5: Draft Scoping Report Comments Received.
	<p><u>Public Participation Process:</u> c) A comments and response trail report (C&R) must be submitted with the final SR. The C&R report must incorporate all historical comments (pre and post submission of the draft SR) for this development. The C&R report must be a separate document from the main report and the format must be in the table format which reflects the details of the I&APs and date of comments received, actual comments received, and response provided. Please ensure that comments made by I&APs are comprehensively captured (copy verbatim if required) and responded to clearly and fully. Please note that a response such as “Noted” is not regarded as an adequate response to I&AP’s comments.</p>	<p>A comments and responses report is Attached in Appendix F2 of the Final Scoping Report. This comments and responses report included all comments receive prior to submission of the Draft Scoping Report as well as comments received on the Draft Scoping Report and afterwards (up until the point of submission of the Final Scoping Report). This same comments and responses report will be further updated in the Draft Environmental Impact Report (in order to capture comments received between submission of the Final Scoping Report and Draft Environmental Impact Report) The Comment and responses report will be further updated on completion of the comment period on the Draft EIR.</p> <p>All comments have been captured verbatim and responded to individually. The Comments and Responses report is in the format proposed by the Department.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> a) The EAP must ensure that all required specialist studies for the project are identified and recommended.</p>	<p>Please refer to section 6 of the Final Scoping Report (Plan of Study for Environmental Impact Assessment). This section identifies all specialist assessments that will take place during the Environmental Impact Assessment phase of the environmental process. It furthermore outlines the aspects that need to be considered and assessed by each of the specialists.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> b) Specialist studies to be conducted must provide a detailed description of their methodology, as well as indicate the locations and descriptions of PV arrays, and all other associated infrastructures that they have assessed and are recommending for authorisations.</p>	<p>At the current phase of the Environmental Impact Assessment Process, specialists are considering the full extent of the study site in order to identify sensitive areas as well as constraints and opportunities for the proposed development. The outcome of the Scoping Level Studies and Site Sensitivity Verifications and the outcome of the initial public participation process will be used to inform the preferred layouts for each of the proposed facilities. These layouts will be presented in the Environmental Impact Assessment phase of the environmental process and all specialists will be required to assess the all aspects of the project in detail. As agreed upon with the Department, separate chapters (assessments) will be undertaken for each of the projects making up the greater Vanderkloof PV and BESS development. The Methodology applied by each of the specialists is outlined in the respective specialist reports attached in Appendices E1 – E6.</p>

	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> c) It is further brought to your attention that Procedures for the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998, when applying for Environmental Authorisation, which were promulgated in Government Notice No. 320 of 20 March 2020 (i.e. “the Protocols”), and in Government Notice No. 1150 of 30 October 2020 (i.e. protocols for terrestrial plant and animal species), have come into effect. Please note that specialist assessments must be conducted in accordance with these protocols. Please note further that the protocols require the specialists’ to be registered with SACNASP in their respective field.</p>	<p>All relevant specialist studies (Terrestrial Biodiversity, Plant Species, Animal Species and Agriculture) will be undertaken in terms of the the Assessment and Minimum Criteria for Reporting on identified Environmental Themes in terms of Sections 24(5)(a) and (h) and 44 of the National Environmental Management Act, 1998. The EAP has verified that all specialists appointed are suitably experienced and qualified as well as appropriately registered with SACNASP.</p> <p>All relevant specialist studies will be undertaken in accordance with the protocols and details of compliance with the protocols will be included in the Draft Environmental Impact Report.</p>
	<p><u>Specialist Assessments to be conducted in the EIA Phase:</u> d) Please include a table in the report, summarising the specialist studies required by the Department’s Screening Tool, a column indicating whether these studies were conducted or not, and a column with motivation for any studies not conducted. Please note that if any of the specialists’ studies and requirements/protocols recommended in the Department’s Screening Tool are not commissioned, motivation for such must be provided in the report per the requirements of the Protocols.</p>	<p>Please refer to Table 18 in Section 3.4.17 of the Final Scoping Report which outlines the specialist studies identified in the screening tool along with confirmation as to which will be undertaken and which will not be undertaken (with motivation). In summary, the following specialist studies will be undertaken in the EIA phase of the Environmental Process:</p> <ul style="list-style-type: none"> - Agricultural Compliance Statement, - Landscape/Visual Impact Assessment, - Heritage Impact Assessment (including Cultural Heritage, Archaeology and Palaeontology), - Terrestrial Biodiversity Impact Assessment, - Aquatic Biodiversity Impact Assessment, - Avifaunal Impact Assessment, - Civil Aviation Compliance Statement (to be undertaken by EAP), - Defense Compliance Statement (to be undertaken by EAP), - Geotechnical Assessment, - Socio-Economic Impact Assessment, - Plant Species Compliance Statement, and - Animal Species Impact Assessment. <p>The only study listed in the screening tool report that will not be undertaken is the RFI Assessment. The Vanderkloof Solar PV and BESS Facilities fall outside of the Northern Cape Province and were furthermore found to be situated more than 156km from the closest Central Astronomy Advantage Area.</p> <p>The South African SKA Project Office and the South African Radio Astronomy Observatory (SARAO) have been registered as a key stakeholder on this environmental process and have been requested to provide input in</p>

		terms of the Astronomy Geographic Advantage Act and potential impact to SKA.
	<p><u>Cumulative Assessments to be conducted in the EIA Phase:</u> Should there be any other similar projects within a 20km radius of the proposed development site, the cumulative impact assessment for all identified and assessed impacts must be refined to indicate the following:</p> <ul style="list-style-type: none"> • Identified cumulative impacts must be clearly defined, and where possible the size of the identified impact must be quantified and indicated, i.e., hectares of cumulatively transformed land. • Detailed process flow and proof must be provided, to indicate how the specialist's recommendations, mitigation measures and conclusions from the various similar developments in the area were taken into consideration in the assessment of cumulative impacts and when the conclusion and mitigation measures were drafted for this project. • The cumulative impacts significance rating must also inform the need and desirability of the proposed development. • A cumulative impact environmental statement on whether the proposed development must proceed. 	<p>There are a number of projects that have been identified to have been authorized within a 20km radius of the proposed Vanderkloof PV and BESS development. Please refer to Appendix D1 Cluster Map showing proximity of Vanderkloof PV and BESS to other projects in the vicinity. The plan of study for EIA in section 6 of the Final Scoping Report as well as the Terms of Reference provided to specialists, require a detailed cumulative impact assessment in compliance with the regulations as well as the criteria outlined in the Departments comment.</p>
	<p><u>General:</u> You are further reminded to comply with Regulation 21(1) of the NEMA EIA Regulations 2014, as amended, which states that: "If S&EIR must be applied to an application, the applicant must, within 44 days of receipt of the application by the competent authority, submit to the competent authority a SR which has been subjected to a public participation process of at least 30 days and which reflects the incorporation of comments received, including any comments of the competent authority".</p>	<p>The Applicant and EAP are aware of the timeframes outlined in Regulation 21(1) of the NEMA EIA Regulations 2014, as amended. The Draft Scoping Report was subjected to a 3 day comment period and this final Scoping Report is submitted within the allowable 44 days from receipt of the application form by the competent authority. According to the EAP's calculations, the 44 day period outlined in regulation 21(1) lapses on Wednesday 08 January 2025.</p>
	<p><u>General:</u> You are further reminded that the final SR to be submitted to this Department must comply with all the requirements in terms of the scope of assessment and content of SRs in accordance with Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended.</p>	<p>The Final Scoping Report submitted to the Department complies with the content requirements of Appendix 2 and Regulation 21(1) of the NEMA EIA Regulations 2014, as amended. Please refer to the table on PDF page 11 of the Final Scoping Report which demonstrates compliance with Appendix 2 and Regulation 21(1).</p>
	<p><u>General:</u> Further note that in terms of Regulation 45 of the EIA Regulations 2014, as amended, this application will lapse if the applicant fails to meet any of the</p>	<p>The requirements in terms of in terms of Regulation 45 of the EIA Regulations 2014, as amended are understood by both the applicant as well as the EAP.</p>

	timeframes prescribed in terms of these Regulations, unless an extension has been granted in terms of Regulation 3(7).	This Final Scoping Report has been submitted within the allowable timeframes and an extension granted in terms of Regulation 3(7) has not been required at this stage of the Environmental Process.
	General: You are hereby reminded of Section 24F of the National Environmental Management Act, Act No. 107 of 1998, as amended, that no activity may commence prior to an Environmental Authorisation being granted by the Department.	The applicant and the EAP are aware of the requirements in Section 24F of the National Environmental Management Act and that the activities may not commence prior to an environmental Authorisation being granted by the Competent Authority.

COMMENT RECEIVED IN PRE-APPLICATION PHASE		
06/02/2024 Email (Online Website Registration) Juan Manuel Valencia Garcia	<p>Relationship the Public Participation Process in terms of the National Environmental Management Act (NEMA, Act No 107 of 1998), about a Proposed Vanderkloof Solar PV Facilities and Integrated Grid Connection Infrastructure in the Letsemeng Local Municipality in the Xhariep District, Free State Province, I would like to tell you as follows:</p> <p>1) My company SUNFOX 11 (PTY) LTD - Registration No. 2015/141843/07 is owner of the following properties in Fauresmith (Free State):</p> <p>a) Joostenberg - Farm No. 462 Fauresmith b) Vingerkrall - Farm No. 368 Fauresmith c) Lombardsdam - Farm No 81 Fauresmith</p> <p>2) I am interested and affected party, apart from other reasons, because:</p> <p>a) These properties are neighbouring to the farms included in the proposed Vanderkloof Solar PV and Integrated Grid Connection Infrastructure mentioned. b) According this project a new powerline is going to run through my farms Vingerkrall y Lombardsdam</p>	<p>Registration as an I&AP has been confirmed. Your preliminary concerns have been reflected in submissions to the competent authority.</p> <p>It is confirmed that this application does not include any powerlines running through farm Vingerkrall and Lombardsdam.</p> <p>All public access roads will remain in place and will be incorporated into the preferred layout alternative for the facility.</p> <p>It is furthermore confirmed that your details have been provided to the social specialist, who will discuss any concerns in detail with you as part of the Environmental Impact Assessment Phase of the Environmental Process.</p>

	<p>c) I access my farms through the road of neighboring farms called Goemansberg, Troostenberg and St. Elmo (Fauresmith), included in the project.</p> <p>d) My company's activity is hunting in my farms in Southafrica for foreigner people. If the project carries out I could not take more hunters obviously and it would be an important financial loss for my company.</p> <p>e) Point d) means negative impact on the economy of this area</p> <p>f) Visual impact</p> <p>g) Environmental impact.</p> <p>Therefore, I am interested and affected Party. So, I am requesting to be registered as a interested and Affected Party (I&AP) for the Full Scoping & EIA process, in response to the below notice.</p>	
<p>05/02/2024 Email (Online Website Registration) Mr David Nunez</p>	<p>Dear Dale and Francois, I see the following projects have been listed on your website:</p> <ul style="list-style-type: none"> • Sunveld EGI • Kareekloof EGI • Vanderkloof Solar PV • Midas BESS • Bakleiplaas BESS • Niewehoop BESS • Kareerand BESS <p>I have registered as an I&AP for all projects and await receipt of BA / S&EIA documentation.</p>	<p>Thanks for the mail. We have registered you on these projects and let you know once the Draft BA's / Draft Scoping Reports are available.</p>
<p>05/02/2024 Email (Online Website Registration) Ms Annitta Attieh</p>	<p>Registration only.</p>	<p>Thank you very much for your online registration for the Vanderkloof Solar PV and BESS Facilities project. Your contact details have been added to our stakeholder register and we will be sure to keep you informed for the remainder of the environmental process.</p>
